

Geometry Pacing Guide

Course Description: Geometry continues the study of geometric concepts building upon middle school topics. Students move from an inductive approach to deductive methods of proof in their study of two and three-dimensional geometric figures. Reasoning skills are emphasized and students broaden their use of the coordinate plane. Appropriate technology from manipulatives to calculators and graphic software is used regularly for instruction and assessment. Competency goals included are: perform operations with real numbers to solve problems, use geometric and algebraic properties of figures to solve problems and write proofs, transform geometric figures on the coordinate plane algebraically.
