

PPO (single) - Attack and extraction

The PPO stays between the threat and the principal to provide cover and evacuate the principle. Important is to get the principal away from the situation (get of the K), and create distance from the threat, don't become static, move and make the principal a hard target to attack. When stepping in front use your force and control and push/pull the principal away from the position of the attack. If needed the PPO can also engage the threat either with pistol or hand to hand combat depending on the situation. Not all PPOs or CPOs are armed. If you engage a threat (at unknown numbers) and you are entangled in a fight, there is no one to protect the principle. Always assess the situation and always think "what if?", what do I do? how do I do it? when do I do it? what resources do I have? how far is it to my nearest safe haven? These things will determine your reaction to an attack.

PPO-2 (option A) - Attack and extraction

CPO leads. The CPO reacts to the threat. The PPO stays in between the CPO and principle and evacuates the principal to the nearest safe haven. Important is to get the principal away from the situation (get of the K), and create distance from the threat, don't become static, move and make the principal a hard target to attack. When stepping in front use your force and control and push/pull the principal away from the position of the attack. The CPO if able will rejoin the PPO and principal to support the evacuation. It is true that this could leave the CPO to handle the threat by himself or herself, which is why planning, preparation and liaison with local security and police is so important. Factoring in that extra help and assistance for contingencies is essential, particularly at key events, such as a large event.

Close Protection Manual:

The Unconventional Close Protection Training Manual Robert Scali,2018-01-27 I wrote this book to teach people with no background in the protection industry how to not only be their own bodyguard but how to learn new skills so that they may eventually protect other people professionally If you want to learn the business and become a Private Security or Close Protection Operator you must learn a series of skill sets How you gain any skill set can vary from person to person Some people acquire the skills in the military police or even after years of hands on martial arts training You do not have to become a Green Beret Navy SEAL or CIA Contractor to acquire a series of proficient skill sets on survival combatives or shooting All you have to do to acquire some new skills in personal protection is to have the desire to learn and then apply what you have learned safely and with a high level of proficiency I will pass on small pearls of wisdom throughout this book The gems that I pass on to you have been passed on to me in many different ways throughout my life Each jewel will be a new skill or a direction to learn The more that you learn the more you will understand Any person with the passion for learning will pick up these new skills and instantly apply them The more that you read about close protection the more you will learn from this book The more that you physically do the more ingrained your skills will become into daily operational procedures Even if you learn just one new thing from this book that saves your life or someone else s then it was worth learning that skill Stay flexible in your thinking and keep an open mind as you read this book The more you learn about yourself the more you will want to know and apply your new skills towards your everyday life Eventually you will be able to tie all of the pearls from this book together and become operationally proficient and stay safe in many different scenarios
