Weik, 2012-12-06 Communications Standard Dictionary is a comprehensive compilation of terms and definitions used in communications and related fields. Communications is defined as the branch of science and technology concerned with the process of representing, transferring, and interpreting the meaning as signed to data by and among persons, places, or machines. Communication is defined as the transfer of information between a source (transmitter, light source) and a sink (receiver, photodetector) over one or more channels in accordance with a protocol and in a manner suitable for interpretation or comprehension by the receiver or as a method or means of conveying information of any kind from one person or place to another. In short, communications is a branch of science and technology, whereas communication pertains to the actual transfer of information. Thus, the word communication should be used as a modifier as in communication center, communication, deception, and communication line, just as in the field of electronics, one speaks of electronic devices and electronic circuits Fiber Optics Standard Dictionary Martin Weik, 2012-12-06 Fiber Optics Vocabulary Development.
