Tracing Your Coalmining Ancestors Brian Elliott, 2014-02-11 A meticulous mixture of social and family history Whether or not you have mining connections this is an interesting socio economic read Your Family Tree In the 1920s there were over a million coalminers working in over 3000

collieries across Great Britain and the industry was one of the most important and powerful in British history. It dominated the lives of generations of individuals, their families and communities, and its legacy is still with us today. Many of us have a coalmining ancestor. Yet family historians often have problems in researching their mining forebears. Locating the relevant records, finding the sites of the pits and understanding the work involved and its historical background can be perplexing. That is why Brian Elliott's concise, authoritative and practical handbook will be so useful for it guides researchers through these obstacles and opens up the broad range of sources they can go to in order to get a vivid insight into the lives and experiences of coalminers in the past. His overview of the coalmining history and the case studies and research tips he provides will make his book rewarding reading for anyone looking for a general introduction to this major aspect of Britain's industrial heritage. His directory of regional and national sources and his commentary on them will make this guide an essential tool for family historians searching for an ancestor who worked in coalmining underground on the pit top or just lived in a mining community. The Education of Children Engaged in Industry in England 1833-1876 Adam Henry Robson, 2019-02-21. Originally published in 1931, this title looks at the education received by children working in industry in England between 1833 and 1876. The industrial revolution created more demand for child labour than ever before, but there were few laws to protect the children involved. School was not compulsory for children until the 1880s, but there were new laws brought in and enforced to reduce the numbers of hours they were allowed to work in industry in 1833 and subsequently in 1844. This title deals with the education of children during that time and the implications of the laws introduced
