What's Making Our Children Sick? Michelle Perro, Vincanne Adams, 2017-11-22 Exploring the links between GM foods glyphosate and gut health With chronic disorders among American children reaching epidemic levels hundreds of thousands of parents are desperately seeking solutions to their children s declining health often with little medical guidance from the experts *What s Making Our Children Sick* convincingly explains how agrochemical industrial production and genetic modification of foods is a culprit in this epidemic Is it the only culprit No Most chronic health disorders have multiple causes and require careful disentanglement and complex treatments But what if toxicants in our foods are a major culprit one that if corrected could lead to tangible results and increased health Using patient accounts of their clinical experiences and new medical insights about pathogenesis of chronic pediatric disorders taking us into gut dysfunction and the microbiome as well as the politics of food science this book connects the dots to explain our kids ailing health *What s Making Our Children Sick* explores the frightening links between our efforts to create higher yield cost efficient foods and an explosion of childhood morbidity but it also offers hope and a path to effecting change The predicament we now face is simple Agroindustrial innovation in a previous era hoped to prevent the ecosystem disaster of DDT predicted in Rachel Carson s seminal book in 1962 *Silent Spring* However this industrial agriculture movement has created a worse disaster a toxic environment and consequently a toxic food supply Pesticide use is at an all time high despite the fact that biotechnologies aimed to reduce the need for them in the first place Today these chemicals find their way into our livestock

and food crop industries and ultimately onto our plates Many of these pesticides are the modern day equivalent of DDT However scant research exists on the chemical soup of poisons that our children consume on a daily basis As our food supply environment reels under the pressures of industrialization via agrochemicals our kids have become the walking evidence of this failed experiment What s Making Our Children Sick exposes our current predicament and offers insight on the medical responses that are available both to heal our kids and to reverse the compromised health of our food supply Perro and Adams book is an alarming eye opening read that documents more clearly than ever the devastating consequences that pervasive pesticide use in food production is having on our health and the urgent need to protect our children from a system that prefers we treat illness and disease with pills rather than prevention Carey Gillam journalist author of *Whitewash* [Impact of Gut Microbiota on Neurogenesis and Neurological Diseases During Early Life](#) Tomás Cerdó ,Cristina Campoy,2025-01-30 In the last years advances in omic technologies such as 16S rDNA gene sequencing metabolomics and proteomics have recently shown the association of the early gut microbiota not only with gastrointestinal disorders but also with diseases affecting other distal organs like the central nervous system CNS suggesting the existence of the gut microbiota brain axis as a complex pathways system capable to regulate mood behaviour and neurocognitive development Despite the recognized importance of proper gut microbiota assembly for child s future health these connections between the early life gut microbiota and neurocognitive development in humans have not been thoroughly explored so far Furthermore most of this knowledge has been obtained from studies in animal models including GF antibiotic treated genetically modified or humanised mice and behavioural models suggesting that the gut microbiota may serve as a biomarker to be explored and a target for mental diseases prevention and treatment Complex communication between gut microbiota and brain is established during prenatal and early postnatal stages in which profound changes in microbial colonization and cognitive development coincides in time but asynchronously regarding attaining peak and maturity Although brain development begins in utero and continues during into adolescence critical steps for establishment of cognitive emotional and behaviour abilities occurs during early postnatal life including neurulation neurogenesis neural migration gliogenesis synaptogenesis myelination and synapse pruning *The Beauty Chef Gut Guide* Carla Oates,2024-12-03 Reap the benefits of a healthy belly with this practical 8 week guide to repairing and resetting your gut [The Diseases of infancy and childhood, designed for the use of students and practitioners of medicine](#) Henry Koplik,1906 *Carbohydrates in Food* Ann-Charlotte Eliasson,2017-08-23 Carbohydrates in Food Third Edition provides thorough and authoritative coverage of the chemical analysis structure functional properties analytical methods and nutritional relevance of monosaccharides disaccharides and polysaccharides used in food Carbohydrates have become a hot topic in the debate about what to eat This new edition includes increased treatment of resistant starch dietary fiber and starch digestion especially in relation to different diets suggesting that carbohydrate consumption should be reduced New to the Third Edition Explains how models for starch

molecules have been improved recently leading to clearer understanding Discusses the growing interest in new sources of carbohydrates such as chitosan and fructans because of their function as prebiotics Features the latest developments on research into dietary fiber and starch digestion Carbohydrates in Food Third Edition combines the latest data on the analytical physicochemical and nutritional properties of carbohydrates offering a comprehensive and accessible single source of information It evaluates the advantages and disadvantages of using various analytical methods presents discussion of relevant physicochemical topics that relate to the use of carbohydrates in food that allow familiarity with important functional aspects of carbohydrates and includes information on relevant nutritional topics in relation to the use of carbohydrates in food
