A Million Cars For A Billion

People Gautam Sen, 27-02-15 Can one car transform a nation The Ford Model T did do so a century ago when it replaced the

horse brought about a revolution in agriculture became a stimulus to urbanization that eventually changed the landscape of America Though the Maruti 800 the Tata Indica the Hyundai Santro and the Maruti Alto became engines of growth for India these cars neither drove away the cow nor changed the way Indians travelled Tata s Nano was expected to change all that and become the ultimate people s car capturing the imagination of the middle class across nations and cultures In spite of its petite dimensions the Nano was meant to stand tall Yet it did not What caused it to fail and fall from grace despite being lauded as the right product at the right time and the most significant new car since the Ford Model T was introduced 100 years ago But is it really all over or is there still hope for India s little wonder What will the people s cars of tomorrow be like A Million Cars for a Billion People delves into the questions concerns and doubts as well as the many misconceptions and myths that have gathered momentum over the years about India s automotive history and the industry s mission to create a true people s car The very first cars that came to India the early beginnings of the industry the nascent history of the automobile across nations like Germany France US the UK Italy Japan and South Korea is narrated with authority and charm from the viewpoint of the quest for the ultimate people s car *The Emerging Asian Auto Markets* ,1996 **Focus Al** Ries,2005-09-27 What s the secret to a company s continued growth and prosperity Internationally known marketing expert Al Ries has the answer focus His commonsense approach to business management is founded on the premise that long lasting success depends on focusing on core products and eschewing the temptation to diversify into unrelated enterprises Using real world examples Ries shows that in industry after industry it is the companies that resist diversification and focus instead on owning a category in consumers minds that dominate their markets He offers solid guidance on how to get focused and how to stay focused laying out a workable blueprint for any company s evolution that will increase market share and shareholder value while ensuring future success *Revue roumaine de géographie* ,1998 **Going Multinational** Frédérique Sachwald,2013-01-11 At the beginning of the 1990s Korean firms embarked on an impressive wave of direct investment abroad This dramatic multinationalization was considered as yet another sign of Korea s remarkable economic performance especially as a high proportion of the foreign ventures were located in advanced countries But this unbalanced quest for globalization actually tested the Korean model to its limits after the 1997 crisis a new policy prepared the way for a surge of inward investment Using empirical tests and case studies this collection shows that Korean groups have invested in developed countries to jump over trade barriers but also to source advanced technology and marketing capabilities Moreover their ambitious strategies have been stimulated by oligopolistic rivalry among the chaebols From a policy perspective the book provides an original discussion of national ownership by questioning the substitutability between inward and outward foreign investment and its relationship with the evolution of the national innovation system By shedding light on the pattern of Korea s internationalization these essays make a valuable contribution to the theory of international production and provide important insights for the current policy debates on globalization and innovation led growth *The Transition from*
