*Information Context: Nature, Impact, and Role* Fabio Crestani, Ian Ruthven, 2005-05-20 CoLIS 5 was the fifth in the series of international conferences whose general aim is to provide a broad forum for critically exploring and analyzing research in areas such as computer science, information science, and library science. CoLIS examines the historical, theoretical, empirical, and technical issues relating to our understanding and use of information, promoting an interdisciplinary approach to research. CoLIS seeks to provide a broad platform for the examination of context as it relates to our theoretical, empirical, and technical development of information-centered disciplines. The theme for CoLIS 5 was the nature, impact, and role of context within information-centered research. Context is a complex, dynamic, and multi-dimensional concept that influences both humans and machines, how they behave individually, and how they interact with each other. In CoLIS 5, we took an interdisciplinary approach to the issue of context to help us understand the theoretical approaches to modelling and understanding context, incorporate contextual reasoning within technology, and develop a shared framework for promoting the exploration of context.

Encyclopedia of Library and Information Sciences John D. McDonald, Michael Levine-Clark, 2017-03-15 The Encyclopedia of Library and Information Sciences, comprising of seven volumes now in its fourth edition, compiles the contributions of major researchers and practitioners and explores the cultural institutions of more than 30 countries. This major reference presents over 550 entries, extensively reviewed for accuracy in seven print volumes or online. The new fourth edition, which includes 55 new entries and 60 revised entries, continues to reflect the growing convergence among the disciplines that influence information and the cultural record, with coverage of the latest topics as well as classic articles of historical and theoretical importance.

**Scholarly Communication in Library and Information Services** Bhaskar Mukherjee, 2010-07-27 This book has been written with a view to understand the validity of the perceptions of Open Access (OA) e-journals in the Library and Information Science (LIS) field. Using relevant OA journals, this book presents and evaluates journals qualitatively and quantitatively. Over the last three hundred years, scholarly journals have been the prime mode of transport in communicating the scholarly research process. However, in the last few decades, a changing scenario has been witnessed in their form and format. OA is an innovative idea that attracts a fair amount of support and opposition around the world because it bridges the gap between digitally divided scholars by solving the pricing and permission crises that have imbalanced the scholarly communication process. Some scholars are of the opinion that OA has led to a chaotic environment where anyone can publish anything. *Scholarly Communication in Library and Information Services* records in detail the impact by accessing the journals' web site qualitatively and quantitatively, in measuring the important elements such as articles, authors, countries, subjects, and cited references. Finally, the book calculates the impact factor using synchronous and asynchronous approaches. First-ever study to extensively evaluate LIS Journals' Web site qualitatively by using a newly developed set of criteria. LIS OA journals are also evaluated quantitatively. Counts citations of LIS OA articles in terms of formal citations by using Google Scholar.
