

Hydraulic reservoir.

The yellow disc must be between the two red rings.

Check with the car in maximum height, and the engine running. Use only Total "LHM" hydraulic fluid; all other fluids must be avoided.

Rear window washer reservoir.
(For functioning see page 23).

Filling engine and gearbox with oil.

All seasons:
TOTAL GOLD 15 W 40.
Never use additives.

Windscreen washer reservoir.
(For functioning see page 23).

Battery.

Maintenance-Free.

Filling the cooling circuit.

To remove the cap: with the engine cold, turn as far as the safety catch, then press so as to be able to continue turning; with the engine hot, wait 10 minutes, stop at the safety catch, and let the steam escape before resuming turning; do not add more than half a litre of cold water to a hot engine; wait until it is cold before topping up.

Manual coolant dipstick.

With the engine stopped, and cold, remove the radiator cap and withdraw the dipstick — a black plastic tube — to check the coolant level.

In all seasons: after topping up, have the concentration of antifreeze checked. The need to add water is a sign of something wrong; have it checked by a Citroën dealer.

Engine/gearbox oil.
Check on level ground, after the engine has been stopped for at least 10 minutes.

Manual Engine-oil dipstick:

The oil level must never exceed the maximum level on the dipstick. The difference between the maximum level and the minimum level is 1 litre. Check at regular intervals and before any long trip.
