Discrimination, Vulnerable Consumers and Financial Inclusion Cătălin-Gabriel Stănescu, Asress Adimi Gikay, 2020-12-28

This book addresses the questions of discrimination vulnerable consumers and financial inclusion in the light of the emerging legal socioeconomic and technological challenges New technologies such as artificial intelligence driven consumer credit risk assessment and Fintech platforms the changing nature of vulnerability due to the ongoing COVID 19 pandemic as well as the sophistication of digital technologies which help circumvent legal barriers and protections necessitate the continuous study of the existing legal frameworks and measures that are capable of tackling these challenges Organized in two major parts the first addresses from multiple national angles the idea of a human rights approach to consumer law in order to replace the mantra of economic efficiency that characterizes financial services with those of human dignity and freedom from discrimination and from debt induced servitude The second tackles the challenges posed by increased usage of technology in connection with financial services which tends to solve but also creates additional issues for consumers in general and for vulnerable groups in particular

Ethics, Efficiency and Macroeconomics in China Jonathan Leightner, 2017-04-21 This book tells the story of how China s leaders from Mao to Xi have sacrificed ethics to promote either macroeconomic performance or microeconomic efficiency This story includes Mao s collectivization of land the Great Leap Forward the Great Cultural Revolution Deng s opening China to international trade Tiananmen Square the freeing of prices food and medicine scandals the 2015 surge and collapse of the Chinese stock market the falling of China s foreign reserves and so on In 2008 China s leaders correctly identified the best strategy as a consumption driven growth strategy because the current world is suffering from a glut of savings However for that strategy to work the Chinese need to be able to trust China s economy and leaders In the absence of trust people will make decisions based on extremely short time frames which will hurt China s long run potential and continue to generate a series of speculative bubbles In the absence of trust wealthy Chinese will continue to move their assets abroad putting tremendous downward pressure on the Chinese yuan The Chinese will develop a long run perspective and invest in China only when they can trust China s future In today s world trust is necessary Trust is built on ethics
