R. Bowker LLC,1983 The TurnAround ToolKit Lynn

Winters, Joan Herman, 2011 Lynn Winters's and Joan Herman's *The Turnaround Toolkit* is written for school leaders who are focused on transforming instruction and who may be working under significant time constraints to reverse declining student achievement or public perceptions of school failure. Based on the evidence that simply implementing continuous improvement is not enough to close the achievement gap, *The Turnaround Toolkit* provides a nine-step formative evaluation program designed to achieve an immediate and consistent focus on improving instruction in order to bolster student achievement. In a straightforward and accessible fashion, Herman and Winters explain three overarching Turnaround Tasks that frame these steps and the necessary and sometimes drastic actions that must be taken by school leaders as they use data to strategically choose, implement, monitor, and revise school interventions. A dedicated online toolkit offers numerous worksheets and templates that support each stage of the process and help school leaders scaffold the work of educators to put an aggressive turnaround plan into action, while a leadership guide at the end of the book provides guidance to turnaround teams and facilitators.

Math and Science for Young Children, Rosalind Charlesworth, Karen Lind, 1990. *Math and Science for Young Children 4E* focuses on the integration of mathematics and science with the other content areas for children from birth through age eight. Based on theories of child development and learning, the book is compatible with the guidelines and standards of major national professional organizations. Mathematics and science concepts are related to national standards and present a common framework for inclusion with music and movement, language arts, visual arts, science, and social studies activities. Developmentally appropriate instructional and assessment practice is stressed, and each concept unit includes assessment, instructional, and evaluation strategies. Technology and Web resources are also provided.
