

CHOOSE YOUR WEAPON

It's a battle out there. Hours preparing the equipment. The constant pressure to be in shape. The change into the best team and the challenge of wills to grab the best line. Probing the competition's weak spots. And the torture of operating at your physical peak for laps after lap after lap.

No one ever said it was going to be easy. But there are things you can do to stack the deck in your favor. Like ride a 1993 Kawasaki KX motorcycle.

Because the best suspended bikes of 1993 are even better this year. The KX66, KX80 and KX90 Big Wheel are back, specially built to govern the future state of the sport. The KX125 and KX250 are radically updated to deliver better performance at every track, and the mighty KX500 is back with improvements that make the nightmare even more manageable.

Even though our bikes are better than ever, you're still only as good as the effort you put in and the support you receive. So, with Kawasaki's Team Owner® program, you can get help with tuning suggestions and the right setup for your bike. It's like having your own racing team.

So when it comes time for battle, talk with your Kawasaki dealer. Because he's got just the weapon you need.

It won't even be a fair fight.

Adjustable front and rear suspension features adjustable preload, compression and rebound damping to help you get dialed in to any track.

The new KX250 is remarkably narrow around the seat section so you can easily maneuver around during aerial stunts.

The new shock will even lock when you leave tracks to let the rear wheel's rebound spring for a better balance of the rear working surface for the front wheel.

New round shock legs are positioned so the foot on the bottom.

• KX125

- The bike is ready to race. It's ready to race and absolutely competitive right out of the crate. 100% KAWASAKI, responsive to the TRACK.
- Fuel tank size great. The seat is even better for more air and midrange power as revealed by the inside ports, compression ratio, piston, expansion chamber and ignition timing.
- Carefully balanced front end includes an alloy crown for more consistent vibration under pressure.
- Handle. It was first with us (it) was again when coverage from better meant the fit for the machine. The better suspension response.
- The off-road power will swing across your body until the program together for under control always ready.
- The seat is made right up to the gas cap and the alloy narrow midstroke makes it easy to move around on the KX, providing a better working platform when doing "airtime."

••• KX66, KX80, BIG WHEEL

- The new suspension frame increases shock response for dual-hitting landing in the same league as our 100cc KX machines.
- Improved engine system. High compression piston, and advanced 2 port dual valve allow work of reliable forward power to get you in the front of the pack and keep you there.
- Control frame fork will be shown later. Balance what better frame lower it and help keep the front end tracking where you point it.
- Shock response about after adjustable compression and rebound damping for flexible response on up or down or under conditions.
- The long life seat and narrow seat section let you shift your weight where you need it -- on a track.
- Control frame shock suspension on the seat for riding, providing stopping power -- on a track.
- Higher track front end shock rear wheel get the big wheel more traction, and the extra shock lets you float over the big stuff!

• KX500

- It's the most advanced machine and high tech motorcycle built on the aluminum floor. It has the best front end rear suspension in the class. • **REWORKING ACTION** REWORKING, January, 1993, on the 1993 KX500. The seat is a new better.
- It's maintenance free weight for better hand dig. There's a lighter frame and suspension. Stronger 1 1/2 inch axle, a new front end lighter plate and shock springs. Stronger seat just under, alloy fork damping rack, a larger diameter shock and front axle and a stronger seat gas tank.
- The shock wheel has aluminum crown
