

1977 CADILLAC SERVICE MANUAL

FOREWORD

This service manual has been prepared by the Service Department of the Cadillac Motor Car Division to aid in servicing 1977 model Cadillac automobiles. It is intended primarily for servicemen who are familiar with earlier model Cadillacs. It includes complete information on service procedures and specifications specific to 1977 Cadillac cars except body service information which is covered in the body service manual.

All information, illustrations and specifications contained in this manual are based on the latest product information available at time of publication. The right is reserved to make changes at any time without notice. Refer to the Cadillac Serviceman for updated information.

When reference is made in this manual to a brand name, number or specific tool, an equivalent product may be used in place of the recommended item.

CAUTION

1977 vehicles contain many parts dimensioned in the metric system. Most fasteners are metric and many are very close in dimension to familiar customary measurements in the inch system. However, it is important to note that, during any vehicle maintenance procedures, replacement fasteners must have the same measurements and strength as those removed, whether metric or customary. Mismatched or incorrect fasteners can result in vehicle damage or malfunction, or possibly personal injury. Therefore, fasteners removed from the vehicle should be saved for re-use whenever possible. Where the fasteners are not satisfactory for re-use, care should be taken to select a replacement that matches the original. The symbol  on some illustrations in this manual indicates metric fasteners.

Riparian Zone Functioning and Strategies for Management,2002-10-10 The Clean Water Act CWA requires that wetlands be
protected from degradation because of their important ecological functions including maintenance of high water quality and
provision of fish and wildlife habitat However this protection generally does not encompass riparian areas the lands
bordering rivers and lakes even though they often provide the same functions as wetlands Growing recognition of the
similarities in wetland and riparian area functioning and the differences in their legal protection led the NRC in 1999 to
undertake a study of riparian areas which has culminated in Riparian Areas Functioning and Strategies for Management The
report is intended to heighten awareness of riparian areas commensurate with their ecological and societal values The
primary conclusion is that because riparian areas perform a disproportionate number of biological and physical functions on a
unit area basis restoration of riparian functions along America s waterbodies should be a national goal
