This practical resource offers a classroom tested framework for secondary math teachers to support students who struggle. Teachers will explore an often overlooked piece of the math achievement puzzle: the gatekeeping cycles of mathematics and the importance of teachers' own expectations of students. The immediately applicable strategies in this book, developed through the author's work as a math intervention teacher, intervention specialist, and instructional coach, will give teachers the tools to help students overcome math anxiety, retention struggles, and even apathy. Beginning with a deep dive into the gatekeeping cycles to help teachers better understand their students who struggle, the book then walks teachers through the five-part BREAKit™ Math Intervention Framework: Build Community, Routines to Boost Confidence, Engage Every Student, Advance Your Expectations, Know Students' Level of Understanding. Educational research, personal anecdotes from the author's own classroom, and examples from case study teachers are woven into each chapter, leading to clear action items, planning strategies, and best practices that are accessible enough to accommodate all grade levels and schedules. The framework and activities in this book enable teachers to help students overcome math anxiety, create a safe math environment for 6-12 students, and ultimately increase achievement with effective, research-based suggestions for working with students who struggle. Teaching in a Networked Environment Allan Edward Bellman, 2006

The Complete Idiot's Guide to Algebra, 2nd Edition W. Michael Kelley, 2007-07-03

Just the facts and figures to understanding algebra. The Complete Idiot's Guide to Algebra has been updated to include easier-to-read graphs and additional practice problems. It covers variations of standard problems that will assist students with their algebra courses, along with all the basic concepts including linear equations and inequalities, polynomials, exponents, and logarithms, conic sections, discrete math, word problems, and more. Written in an easy-to-comprehend style to make math concepts approachable. Award-winning math teacher and author of *The Complete Idiot's Guide to Calculus* and the bestselling advanced placement book in ARCO's Master series. Download a sample chapter.

Choosing and Using Curriculum Joyce Herzog, 2015-03-16

Have you ever asked yourself any of these questions: What am I doing? Why am I doing it that way? Are there other ways? Which way is best for my family? Where do I get the resources I need to make it happen? How do I avoid over-spending on curriculum? This book is a wealth of information. Topics and chapters include: Comparison of reading programs, Comparison of math programs, Developing written expression, Adapting materials for special situations, General homeschooling resources, Resources for blind, deaf, and speech language, Curriculum types and styles, How to take a snapshot of your child's progress. This book is a two-hour read that will provide you with direction, comfort, and the means to make your homeschool some together in the ways you dream of. It will help you clear your brain and know your mind, and then find the resources you need to carry out your newly discovered vision. You don't want to start homeschooling without it.
