

SOME IMPROVISED MINES

There are all things you can easily make yourselves as the materials are easy to find.

The first step is to make a "barrier". This can be made by filling a small can with Gelignite—1 lb. is enough—and inserting in a small hole of Cardboard on the end of a 2 1/2' length. Bring the spare end out through the lid.

The next step is to make the "dragnet" part of the mine. The dragnet itself is made of small pieces of scrap metal such as nuts and bolts—wash, etc. If you can't get these you can use any stones. Push these into a baggie or around the barrier. The more dragnet the better—but remember you will have to carry the thing along.

Another idea is to bury the barrier in a small bag of earth.

Another very good method is to use an old motor cycle cylinder block and Gelignite. This has to be very well.

Yet another is to put several feet of sticks of Gelignite together by passing a length of Cardboard through the center of each and leaving a space of 1/2 in. or so between them. Then put the string of scrap iron a length of scrap iron over you.

With a little imagination dozens of other ideas will present themselves, and they will probably be better suited to your part of the country. The essential point is that the number of things you can use in setting the apparatus is not too small.

Bomb Making Manual:

The Wrong Hands Ann Larabee, 2015-06-15 A valuable account The Wrong Hands brilliantly guides us through the challenges to American democracy Howard P Segal Times Higher Education Gun ownership rights are treated as sacred in America but what happens when dissenters moved beyond firearm possession into the realm of high explosives How should the state react Ann Larabee s The Wrong Hands a remarkable history of do it yourself weapons manuals from the late nineteenth century to the recent Boston Marathon bombing traces how efforts to ferret out radicals willing to employ ever more violent methods fueled the growth of the American security state But over time the government s increasingly forceful targeting of violent books and ideas not the weapons themselves threatened to undermine another core American right free expression In the 1886 Haymarket Square bombing a new form of revolutionary violence that had already made its mark in Europe arrived in the United States At the subsequent trial the judge allowed into evidence Johann Most s infamous The Science of Revolutionary Warfare which allegedly served as a cookbook for the accused Most s work was the first of a long line of explosive manuals relied on by radicals By the 1960s small publishers were drawing from publicly available US military sources to produce works that catered to a growing popular interest in DIY weapons making The most famous was The Anarchist Cookbook 1971 which soon achieved legendary status and a lasting presence in the courts Even novels such as William Pierce s The Turner Diaries have served as evidence in prosecutions of right wing radicals More recently websites explaining how to make all manner of weapons including suicide vests have proliferated The state s right to police such information has always hinged on whether the disseminators have legitimate First Amendment rights Larabee ends with an analysis of the 1979 publication of instructions for making a nuclear weapon which raises the ultimate question should a society committed to free speech allow a manual for constructing such a weapon to disseminate freely Both authoritative and eye opening The Wrong Hands will reshape our understanding of the history of radical violence and state repression in America
