disputes that employment relations worldwide have been greatly affected by globalisation no clear consensus has emerged  
on the nature and significance of this impact The seven contributions to this symposium pursue a comparative approach  
suggesting that direct analysis of employment relations in distinct industries in two comparably sized economies since the  
advent of globalisation leads to a more precise understanding of the interaction of globalisation and employment relations  
and sets a pattern for other studies to follow The economies studied in the symposium are Australia and Korea and the  
industries are automobile and auto parts manufacturing and retail banking In both countries labour unions play a key role in  
the way in which employers and governments react to political and economic pressures Among the particular topics  
discussed by the contributors are the following effects of the 1997 financial crisis in Korea the extent to which the  
automobile industry in one country Korea depends on parts and raw material from another country Australia cross border  
cooperation between unions the growing trend toward enterprise bargaining conciliation and arbitration of industrial  
disputes and the role of government sponsored industrial relations commissions The contributing authors are all industrial  
relations authorities in Australia or Korea The in depth analysis they offer in these very specific areas will be of value to  
labour lawyers and industrial relations scholars everywhere for the light it sheds on this crucial aspect of contemporary  
social and economic development      **The Complete Small Truck Cost Guide, 1996** Inc Intellichoice,1996-03
