2. Describe the cause and consequences of the credit crisis of 2007 – 2009.
3. Describe the similarities and differences between a bank holding company and a financial holding company.
4. Describe various banking models.
5. Describe various channels for delivering banking services.

Key Concepts

1. "Sub-Prime" mortgages led to much of the credit crisis of 2007 – 2009. Many lenders made mortgages:
 - a. to borrowers with insufficient income to make the monthly payments,
 - b. with low teaser rates,
 - c. low payments resulting in negative amortization.

As these mortgages defaulted, many mortgage companies saw their capital depleted. Declining real estate values had the largest impact in the areas that had the highest run-up in property values. Larger banks tended to experience large losses while many small banks did not.

2. After the failure of several large financial institutions, the government responded by:
 - a. placing Fannie Mae and Freddie Mac into conservatorship,
 - b. loaning AIG over \$150 billion,
 - c. temporarily increasing FDIC coverage to \$250,000,
 - d. insuring money market mutual funds,
 - e. establishing the Troubled Asset Relief Program (TARP)
 - f. establishing the Term Asset-Backed Securities Loan Facility (TALF)
 - g. investing \$125 billion in several large U.S. banks,
 - h. promoting mortgage loan modifications.
3. Banks differ in terms of their size and the scope of products they offer. Global banks offer a wide array of products and services globally. Super-Regional Banks are similar to global banks but smaller in size and market penetration, while Community Banks typically have a smaller trade area and total assets under \$1 billion.
