1000 Mythological Characters Briefly Described : Adapted to Private Schools, High Schools and Academies Edward S. Ellis, 1000 Mythological Characters Briefly Described Adapted to Private Schools High Schools and Academies Since the names of the Greek heroes and gods show a general correspondence with the Sanskrit appellations of physical things it is comparatively easy to understand many of 10 the first fancies and reflections of the earliest men who ever lived It is the argument of the philologists that these

fancies and reflections settled into definite shape in that far away period when most of the nations now spread to the remotest corners of the earth dwelt together and used a common language Following the gradual scattering of this single unified people the language became sensitive to the change many words not only losing their original meaning but in some instances acquiring an opposite significance Other words again in the course of time were utterly lost As long as such personified beings as the Heaven or the Sun are consciously talked of in mythic language the meaning of their legends is open to no question and the action ascribed to them will as a rule be natural and appropriate The time came however when these names were considered simply as applying to heroes or deities and amid the jumble and confusion of the succeeding ages it became well nigh impossible to trace the myths back to their original source and meaning Such is a brief outline of the myth interpretations as made by the philologists
