Human Reproduction Casey Rand,2009 Human Reproduction is an amazing process Learn the physical changes that occur in humans to ready their bodies with the equipment needed to reproduce This book explains these changes and also explores what happens during conception pregnancy and the delivery of a new baby What are genes and DNA Why is every person unique The answers might surprise you Sci Hi is an engaging comprehensive and visually stimulating series that takes learning science core curriculum to a whole new level

How We Do It Robert Martin,2013-06-11 Despite the widespread belief that natural is better when it comes to sex pregnancy and parenting most of us have no idea what natural really means the origins of our reproductive lives remain a mystery Why are a quarter of a billion sperm cells needed to fertilize one egg Are women really fertile for only a few days each month How long should babies be breast fed In *How We Do It* primatologist Robert Martin draws on forty years of research to locate the roots of everything from our sex cells to the way we care for newborns He examines the procreative history of humans as well as that of our primate kin to reveal what s really natural when it comes to making and raising babies and distinguish which behaviors we ought to continue and which we should not Although it s not realistic to raise our children like our ancestors did Martin s investigation reveals surprising consequences of and suggests ways to improve upon the way we do things now For instance he explains why choosing a midwife rather than an obstetrician may have a greater impact than we think on our birthing experience examines the advantages of breast feeding for both mothers and babies and suggests why babies may be ready for toilet training far earlier than is commonly practiced *How We Do It* offers much needed context for our reproductive and child rearing practices and shows that once we understand our evolutionary past we can consider what worked what didn t t and what it all means for the future of our species

A Guide to Reproduction Irina Pollard,1994-06-23 The purpose of this comprehensive text is to increase awareness of human reproduction and its consequences The central theme links reproductive capacity the social consequences of the multiple stresses this places on the environment and the ways this relates back to the reproductive health of humans and other animals In the first section the biology of human reproduction is discussed including such topics as the treatment and causes of infertility growth and maturation parental behaviour and neonate biology The effects of procreational biology on the foundation of human social structure are also examined The second part deals with reproduction as it relates to health and social issues such as stress fertility control AIDS teratogens and errors of sexual differentiation It is an invaluable resource for all those wishing to update their knowledge of human reproductive biology
