Campus Conversations Jeffery W. Galle,Denise Pinette Domizi,2021-11-15 The eight essays in Campus Conversations provide some of the best scholarly work emerging from individual faculty learning communities in a statewide program called the Chancellor s Learning Scholar CLS program The CLS program began in 2018 as an initiative designed to include large numbers of the University System of Georgia s USG about 12 000 fulltime teaching faculty in the USG s statewide student success efforts The approximately 2

000 faculty who have participated in the first two years of the CLS program learned about the eight pedagogies of student success which can help engage students more deeply thereby retaining them and deepening their learning. These pedagogies include small teaching based on the Jim Lang book, inclusive pedagogy, Transparency in Learning and Teaching (TiLT), course design, high impact practices, HIPs, brain-based learning, academic mindset, and the Scholarship of Teaching and Learning (SoTL). As teaching and learning scholarship, each essay has its origin in the topic for which the learning community was formed. The collection demonstrates the range of topics and many of the ways in which USG faculty have explored and applied these pedagogies to their own institutional contexts and courses. The essays selected for inclusion in this volume also embody different responses to the outcomes of the program as set out at the inception of the program.

Mathematics Magazine, 1976 **The Effect of a Microcomputer-based Biology Study Center on Achievement and Attitudes in High School Biology Students** Casey Roy Lu, 1993 **Scientific Integrity** Francis L. Macrina, 2014-07-01 This widely adopted textbook provides the essential content and skill building tools for teaching the responsible conduct of scientific research. Scientific Integrity covers the breadth of concerns faced by scientists: protection of animal and human experimental subjects, scientific publication, intellectual property, conflict of interest, collaboration, record keeping, mentoring, and the social and ethical responsibilities of scientists. Learning activities and resources designed to elucidate the principles of Scientific Integrity include dozens of highly relevant interactive case studies for discussion in class or online. Numerous print and online resources covering the newest research guidelines, regulations, mandates, and policies. Discussion questions, role playing exercises, and survey tools to promote critical thought. Documents including published rules of conduct, sample experimentation protocols, and patent applications. The new edition of Scientific Integrity responds to significant recent changes: new mandates, policies, laws, and other developments in the field of responsible conduct of research. Dr. Macrina plants the seeds of awareness of existing, changing, and emerging standards in scientific conduct and provides the tools to promote critical thinking in the use of that information. Scientific Integrity is the original turnkey text to guide the next generations of scientists as well as practicing researchers in the essential skills and approaches for the responsible conduct of science.

Child Development From Infancy to Adolescence Laura E. Levine, Joyce Munsch, 2018-11-29 Chronologically organized, *Child Development From Infancy to Adolescence*, Second Edition, presents topics within the field of child development through unique and highly engaging Active Learning opportunities. The Active Learning features integrated within the print text and digital program foster a dynamic and personal learning process for students. Within each chapter, authors Laura E. Levine and Joyce Munsch introduce students to a wide range of real-world applications of psychological research to child development. The in-text pedagogical features and the accompanying digital components help students discover the excitement of studying child development and equip them with skills they can use long after completing the course.
