Television Jeremy G. Butler, 2012-02-20 For nearly two decades *Television Critical Methods and Applications* has served as the foremost guide to television studies. Designed for the television studies course in communication and media studies curricula, *Television* explains in depth how television programs and commercials are made and how they function as producers of meaning. Author Jeremy G. Butler shows the ways in which camera style, lighting, set design, editing, and sound combine to produce meanings that viewers take away from their television experience. He supplies students with a whole toolbox of implements to disassemble television and read between the lines, teaching them to incorporate critical thinking into their own television viewing. The fourth edition builds upon the pedagogy of previous editions to best accommodate current modes of understanding and teaching television. Highlights of the fourth edition include a new chapter and part organization to reflect the current approach to teaching television with greatly expanded methods and theories, chapters on an entirely new chapter on modes of production and their impact on what you see on the screen, discussions integrated throughout on the latest developments in television, convergence with other media such as material on transmedia storytelling and YouTube's impact on video distribution. Over three hundred printed illustrations, including new and better quality frame grabs of recent television shows and commercials, a companion website featuring color frame grabs, a glossary, flash cards, and editing and sound exercises for students, as well as PowerPoint presentations, sample syllabi, and other materials for instructors. Links to online videos that support examples in the text are also provided. With its distinctive approach to examining television, *Television* is appropriate for courses in television studies, media criticism, and general critical studies.

Genre and performance: film and television Christine Cornea, 2021-06-15 Looking at contemporary film and television, this book explores how popular genres frame our understanding of on-screen performance. Previous studies of screen performance have tended to fix upon star actors, directors, or programme makers, or they have concentrated upon particular training and acting styles. Moving outside of these confines, this book provides a truly interdisciplinary account of performance in film and television and examines a much neglected area in our understanding of how popular genres and performance intersect on screen. Each chapter concentrates upon a particular genre or draws upon generic case studies in examining the significance of screen performance. Individual chapters examine contemporary film noir, horror, the biopic, drama, documentary, the western, science fiction, comedy, performance in spoof news programmes, and the television sit-com and popular Bollywood films.
