*State of War* Paul A. C. Koistinen, 2012-09-16 In his farewell speech President Dwight Eisenhower famously warned us of the dangers of a military industrial complex MIC In Paul Koistinen's sobering new book that warning appears to have been both prophetic and largely ignored As the final volume in his magisterial study of the political economy of American warfare *State of War* describes the bipolar world that developed from the rivalry between the U S and USSR showing how seventy years of defense spending have bred a monster that has sunk its claws into the very fabric of American life Koistinen underscores how during the second half of the twentieth century and well into the twenty first the United States for the first time in its history began to maintain large military structures during peacetime Many factors led to that result the American economy stood practically alone in a war ravaged world the federal government especially executive authority was at the pinnacle of its powers the military accumulated unprecedented influence over national security and weaponry became much more sophisticated following World War II Koistinen describes how the rise of the MIC was preceded by a gradual process of institutional adaptation and then supported and reinforced by the willing participation of Big Science and its industrial partners the broader academic world and a proliferation of think tanks He also evaluates the effects of ongoing defense budgets within the context of the nation's economy since the 1950s Over time the MIC effectively blocked efforts to reduce expenditures control the arms race improve relations with adversaries or adopt more enlightened policies toward the developing world all the while manipulating the public on behalf of national security to sustain the warfare state Now twenty years after the Soviet Union's demise defense budgets are higher than at any time during the Cold War As Koistinen observes more than six decades of militaristic mobilization for stabilizing a turbulent world have firmly entrenched the state of war as a state of mind for our nation Collectively his five volume opus provides an unparalleled analysis of the economics of America's wars from the colonial period to the present illuminating its impact upon the nation's military campaigns foreign policy and domestic life

In this carefully crafted volume, Michael Kort describes the wartime circumstances and thinking that form the context for the decision to use these weapons, surveys the major debates related to that decision, and provides a comprehensive collection of key primary source documents that illuminate the behavior of the United States and Japan during the closing days of World War II. Kort opens with a summary of the debate over Hiroshima as it has evolved since 1945. He then provides a historical overview of the events in question, beginning with the decision and program to build the atomic bomb. Detailing the sequence of events leading to Japan's surrender, he revisits the decisive battles of the Pacific War and the motivations of American and Japanese leaders. Finally, Kort examines ten key issues in the discussion of Hiroshima and guides readers to relevant primary source documents, scholarly books, and articles.
