*Low-Cost Aircraft Structural Repair and Maintenance Study* W. D. Dotseth, R. W. Nickel, W. E. Routh, ROCKWELL INTERNATIONAL LOS ANGELES CALIF LOS ANGELES AIRCRAFT DIV., 1977 This report documents the research and analysis conducted to 1 identify high cost structural repair and maintenance items in existing U S military aircraft 2 conduct a design study on means to reduce life cycle costs for a number of selected structural problems on fighter bomber and cargo tanker class aircraft and 3 to develop a design handbook to provide guidance and information on methods to reduce aircraft structure cost of ownership This program was limited to existing military aircraft metallic type structures since separate programs for adhesively bonded and advanced composite structure design and repair are being developed by the Structures Division FBS of the Air Force Flight Dynamics Laboratory The design handbook has been published as document No AFFDL TR 76 72 Aircraft Structural Design Handbook for Lower Cost Maintenance and Repair Author **Aircraft Sustainment and Repair** Rhys Jones, A.A. Baker, Neil Matthews, Victor K. Champagne, 2017-12-05 Aircraft Sustainment and Repair is a one stop shop for practitioners and researchers in the field of aircraft sustainment adhesively bonded aircraft joints bonded composites repairs and the application of cold spray to military and civil aircraft Outlining the state of the art in aircraft sustainment this book covers the use of quantitative fractography to determine the in service crack length versus flight hours curve the effect of intergranular cracking on structural integrity and the structural significance of corrosion The book additionally illustrates the potential of composite repairs and SPD applications to metallic airframes Covers corrosion damage assessment and management in aircraft structures Includes a key chapter on U S developments in the emerging field of supersonic particle deposition SPD Shows how to design and assess the potential benefits of both bonded composite repairs and SPD repairs to metallic aircraft structures to meet the damage tolerance requirements inherent in FAA ac 20 107b and the U S Joint Services **Aircraft Structural Design Handbook for Lower Cost Maintenance and Repair** Walter D. Dotseth, R. W. Nickel, W. E. Routh, ROCKWELL INTERNATIONAL LOS ANGELES CA LOS ANGELES AIRCRAFT DIV., 1977 This document has been prepared to serve a growing need in the military to reduce aircraft structural maintenance costs to a more reasonable level commensurate with acceptable life cycle costs It is designed as an informative guide which will aid the aircraft designer in foreseeing maintenance problems and make proper trade off evaluations to optimize the structural design for total life cycle costs The handbook points up several examples of high maintenance cost items on existing in service aircraft and suggests changes to substantially reduce the life cycle cost In addition many other costly maintenance items discovered during visits to military and industry maintenance and repair facilities are cited which could have been avoided or substantially reduced by more cost effective considerations for serviceability during design In this respect the handbook includes not only information on past problem areas in the form of lessons learned but recommended considerations during initial design of every aspect of structural development Since corrosion damage repair

was found to be one of the most costly maintenance items a part of the handbook provides design information usable in its prevention Also since the handbook is directed primarily toward the development of military aircraft a section is devoted to battle damage and design considerations to increase survivability and permit repairs to minimize downtime on the aircraft
