[Airport Passenger Terminal Planning and Design](#) Landrum & Brown, 2010 TRB's Airport Cooperative Research Program ACRP Report 25 Airport Passenger Terminal Planning and Design comprises a guidebook spreadsheet models and a user's guide in two volumes and a CD ROM intended to provide guidance in planning and developing airport passenger terminals and to assist users in analyzing common issues related to airport terminal planning and design Volume 1 of ACRP Report 25 explores the passenger terminal planning process and provides in a single reference document the important criteria and requirements needed to help address emerging trends and develop potential solutions for airport passenger terminals Volume 1 addresses the airside terminal building and landside components of the terminal complex Volume 2 of ACRP Report 25 consists of a CD ROM containing 11 spreadsheet models which include practical learning exercises and several airport specific sample data sets to assist users in determining appropriate model inputs for their situations and a user's guide to assist the user in the correct use of each model The models on the CD ROM include such aspects of terminal planning as design hour determination gate demand check in and passenger and baggage screening which require complex analyses to support planning decisions The CD ROM is also available for download from TRB's website as an ISO image *Handbook of Checked Baggage Screening* Norman E. L. Shanks, Alexandre L. W. Bradley, 2005-08-19 *Handbook of Checked Baggage Screening* Advanced Airport Security Operation is a practical guide for project managers and designers embarking on hold baggage screening developments within the airport environment for the first time The book clearly explains away any uncertainty about the processes and procedures to be used by the various parties involved within the industry and sets out best practice with respect to checked baggage screening design Valuable lessons can be learned from actual case studies contributed by leading equipment manufacturers on recent 100% hold baggage screening projects In addition to the all important security screening of baggage and passengers the book also looks at the following areas associated with airport security through the use of a detailed structured security check list evaluation questionnaire The questionnaire allows airports to assess the state of readiness of their airports and then using the other chapters gain an insight regarding which technology will best solve any security gaps The authors offer a unique perspective through their background and experience Many of the checked baggage screening procedures and equipment discussed in the book have already been implemented in the UK with the authors responsible for leading this effort The combined experience they can offer to the industry world wide is invaluable **A Decision-Makers Guide to Public Private Partnerships in Airports** Andy Ricover, Jeffrey Delmon, 2019-12-06 Airport development is critical to economic growth and poverty reduction This book will help decision makers assess whether Public Private Partnerships PPP might be a viable option to meet their airport development

requirements It walks the reader through the airport PPP process from early preparation to bringing the project to market and managing the project during implementation The book will help eradicate misconceptions about the role of the private sector in airport infrastructure A Decision Makers Guide to Public Private Partnerships in Airports provides an essential guide for those in a position to make decisions linked to airport development to their advisers their staff and also to students wishing to understand airport PPP

Airport Passenger Conveyance Systems Planning Guidebook TransSolutions, LLC.,2012 Describes best practices and specific design considerations and presents decision making frameworks for implementing passenger conveyance systems Passenger conveyance components include escalators elevators moving walkways and passenger assist vehicles carts Automated People Mover systems the subject of ACRP Reports 37 and 37A personal rapid transit systems and shuttle bus systems are not covered in the Guidebook In addition to the Guidebook ACRP Report 67 also includes a comprehensive database along with a Decision Support Tool for planning designing and evaluating passenger conveyance systems at airports as a function of specific airport design and operating parameters This database allows project planners to examine how passenger conveyance components operate as a system throughout different areas within the airport environment Foreword

Airport Design and Operation Antonin Kazda,Robert E. Caves,2015-08-05 In this third edition the chapters have been enhanced to reflect changes in technology and the way the air transport industry runs Key topics that are newly addressed include low cost airline operations security issues and EASA regulations on airports A new chapter covering extended details about wildlife control has been added to the volume
