**Health Promotion in Schools, Universities, Workplaces, and Communities** Graça S. Carvalho,Emily Darlington,Teresa Vilaça,2024-12-17 Health education well being improvement and advocacy are effective health promotion strategies among cutting edge Public Health practices Salutogenic perspectives rooted in ecological models have taken their rightful place to empower individuals and communities to change their life ecosystems and preserve and improve their health It is imperative to shift from targeting protective or risk factors which have linear causal relationships with health conditions and or comorbidities and encompass a systemic understanding of the role of health determinants in creating health Individual collective and structural ecological approaches can better reduce health inequities Moreover engaging the presumed beneficiaries from such strategies ensures that actual needs are identified and choices are context specific It improves the whole implementation process as well as its results Higher levels of participation such as co creation imply a bottom up voluntary collaborative process rooted in values of diversity mutual trust openness autonomy freedom and respect as well as shared expertise responsibility and decision making which are essential values in co creating health promotion

**Responses and Adaptations to Novel Exercise Modalities** Kevin D. Ballard,Kyle Timmerman ,Jessica Bourne,2026-02-02 In the realm of physical fitness traditional exercise modalities have evolved to include not only standard practices but also diverse approaches like yoga High Intensity Interval Training HIIT and electric biking e biking While these modalities vary significantly they share the common goal of enhancing accessibility and improving the physical health and well being of individuals The emerging interest in these unconventional exercises highlights a growing need to understand the physiological responses and adaptations elicited by these unconventional exercises to optimize training protocols enhance performance and promote overall health A growing body of recent studies highlights the distinct physiological mechanisms activated by these exercise modalities showing diverse effects on

cardiovascular health metabolic rates exercise adherence and overall physical health and performance These findings suggest that understanding these unique responses is critical for developing enhanced training protocols that support health improvements and disease prevention The broad implications of these results necessitate further exploration to better integrate unconventional exercises into broader health and wellness strategies This Research Topic aims to explore the complex interactions between unconventional exercise modalities and human physiology further To deepen our understanding in this field we are calling for original research articles review papers and case reports that investigate Cardiovascular adaptations Metabolic responses Muscular adaptations Respiratory changes Neurological adaptations Endocrine responses Immune system effects Thermoregulatory responses By collating a diverse array of studies from controlled lab experiments to longitudinal field studies this collection seeks to forge new pathways in the application of these insights to promote holistic health oriented exercise regimes
