A Presentist Path To World Peace:

A Presentist Path to World Peace M. G. Person, 2014-10-10 **The Road to Ukraine** Frank Furedi, 2022-08-01 Russia's invasion of Ukraine is the latest chapter in a series of events that have their origins in World War One. The difficult existential questions that emerged before and during this conflict still remain unresolved. Contrary to the claim that wars are not supposed to happen in Europe or that we live in the era of the End of History, the experience of Ukraine highlights the salience of the spell of the past. The failure of the West to take its past seriously has left it confused and unprepared to deal with the current crisis. Unexpectedly fashionable claims about the irrelevance of borders and of nation states have been exposed as shallow myths. The author argues that the West's self-inflicted condition of historical amnesia has encouraged it to disregard the salience of geo-political realities. Suddenly, the once fashionable claims that made up the virtues of globalisation appear threadbare. This problem, which was already evident during the global Covid pandemic, has reached a crisis point in the battlefield of Ukraine. History has had its revenge on a culture that believes that what happened in the past no longer matters. *The Road To Ukraine: How the West Lost Its Way* argues that overcoming the state of historical amnesia is the precondition for the restoration of global solidarity.

Beyond 'Presentism', 2009-01-01. Precisely titled, this powerful collection constitutes a chronotope, an erudite enactment of interstices within and among historical time, spiritual place, and political culture. A recollection focused forward to those hybrid generations in Canadian classrooms whose frontier is haunted by forts populated by not always their ancestors, inscribed in their national, regional, aboriginal identities. Homophobic, hygienic, the curriculum is always already inhabited by the language of the Other, propelling us toward post-post-being forested in difference, rooted in images refracted through mirrors and windows. In constructing this crucial collage of decolonization, the contributors summon us to study with them the place we inhabit.

WILLIAM F. PINAR, Professor and Canada Research Chair, Department of Curriculum and Pedagogy, University of British Columbia, Canada. [The Marrying Monk](#) Dadajii Vimalananda, 2013-10-31. Dada has spent the last 40 years of his life living among us just as a normal human being. He never asked for any special treatment or recognition. He always gave his spiritual teachings freely and has served his community in every possible capacity while still facing the same marital, familial, financial challenges that we all face. Dada's life is an inspiration to us all. He has shown the way to all Americans that we can face each daily challenge, struggle, and hardship and still keep our inner strength, our poise, and our purpose through it all. Dada's story will amaze you, will amuse you, and will astound you, and finally, it will inspire in you the confidence that you can accomplish all that Dada has accomplished in your life as well.

[Peace Pact](#) David C. Hendrickson, 2003. That New England might invade Virginia is inconceivable today. But interstate rivalries and the possibility of intersectional war loomed large in the thinking of the Framers who convened in Philadelphia in 1787 to put on paper the ideas that would bind the federal union together. At the end of the Constitutional Convention, Benjamin Franklin rejoiced that the document would astonish our enemies who are

waiting to hear with confidence that our States are on the point of separation only to meet hereafter for the purpose of cutting one another's throats Usually dismissed as hyperbole this and similar remarks by other Founders help us to understand the core concerns that shaped their conception of the Union By reexamining the creation of the federal system of the United States from a perspective that yokes diplomacy with constitutionalism Hendrickson's study introduces a new way to think about what is familiar to us This groundbreaking book tells the story of how thirteen colonies became independent states and found themselves grappling with the classic problems of international cooperation The founding generation Hendrickson argues developed a sophisticated science of i

The New Histories of International Criminal Law Immi Tallgren, Thomas Skouteris, 2019-03-21 The language of international criminal law has considerable traction in global politics and much of its legitimacy is embedded in apparently axiomatic historical truths This innovative edited collection brings together some of the world's leading international lawyers with a very clear mandate in mind to re-evaluate and re-trial the dominant historiographical tradition in the field of international criminal law Carefully curated and with contributions by leading scholars The New Histories of International Criminal Law pursues three research objectives to bring to the fore the structure and function of contemporary histories of international criminal law to take issue with the consequences of these histories and to call for their demystification The essays discern several registers on which the received historiographical tradition must be re-tried tropology inclusions exclusions gender race representations of the victim and the perpetrator history and memory ideology and master narratives international criminal law and hegemonic theories and more This book intervenes critically in the fields of international criminal law and international legal history by bringing in new voices and fresh approaches Taken as a whole it provides a rich account of the dilemmas conundrums and possibilities entailed in writing histories of international criminal law beyond against or in the shadow of the master narrative

The Social Life of Connectivity in Africa Mirjam de Bruijn, Rijk van Dijk, 2012-12-05 The rapid increase in adoption of modern connective technologies like the mobile phone has reshaped the social landscape of Africa This book examines the myriad possibilities that the post-global moment offers African societies to develop and to relate offering profound new insights into the processes of globalization

Talking About Nothing Jody Azzouni, 2010-09-30 Ordinary language and scientific language enable us to speak about in a singular way using demonstratives and names what we recognize not to exist fictions the contents of our hallucinations abstract objects and various idealized but nonexistent objects that our scientific theories are often couched in terms of Indeed references to such nonexistent items especially in the case of the application of mathematics to the sciences are indispensable We cannot avoid talking about such things Scientific and ordinary languages thus enable us to say things about Pegasus or about hallucinated objects that are true or false such as Pegasus was believed by the ancient Greeks to be a flying horse or That elf I'm now hallucinating over there is wearing blue shoes Standard contemporary metaphysical views and semantic analyses of singular idioms on offer in contemporary philosophy of language

have not successfully accommodated these routine practices of saying true and false things about the nonexistent while simultaneously honoring the insight that such things do not exist in any way at all and have no properties That is philosophers often feel driven to claim that such objects do exist or they claim that all our talk isn't genuine truth apt talk but only pretence This book reconfigures metaphysics and the role of metaphysics in semantics in radical ways that allow the accommodation of our ordinary ways of speaking of what does not exist while retaining the absolutely crucial presupposition that such objects exist in no way at all have no properties and so are not the truth makers for the truths and falsities that are about them

Presentism Ernâni Magalhães, Nathan L. Oaklander, 2010-10-28 There is no time like the present Is it also true that there is no time but the present According to presentism the present time is special in the most fundamental sense because all of reality is included in it What is past is no longer what is future is yet to be This philosophy of time with roots as far back as Saint Augustine and beyond is the focus of vigorous and widespread discussion in contemporary philosophy *Presentism Essential Readings* brings together for the first time the seminal works by both presentists and their opponents Works by Augustine McTaggart Prior Craig and others address a wide array of issues concerning presentism How can time pass if everything is present Is there no future to come to the present nor a past to receive the present How can there be truths about the past Generally a statement is true because of events in reality But if presentism is correct then the past would seem to lack a basis in reality If only the present is real how can things last To persist seems to require that something exist at more than one time but presentism holds that there is only one time the present The collected essays on presentism address these and other aspects of the debate a debate that is just beginning With explanatory introductions written by the editors *Presentism Essential Essays* will fascinate and stretch the minds of both scholars and novices alike

Maestri of Political Science Donatella Campus, Gianfranco Pasquino, Martin Bull, 2011-06-01 This book continues the editors work started in the volume *Masters of Political Science* of highlighting and re-evaluating the contributions of the most important political scientists who have gone before Its basis is the belief that the future development and sophistication of the discipline will benefit from a critical understanding of the works of early political giants whose contributions are presented and analysed Gabriel A Almond Raymond Aron Philip Converse Maurice Duverger Stanley Hoffmann Paul Lazarsfeld Arend Lijphart Elinor Ostrom William H Riker Stein Rokkan and Susan Strange The editors review and consider the contributions of these maestri to the study of contemporary democracy political culture electoral systems political communication the transformation of capitalism and state formation in Europe *Maestri of Political Science* is aimed not only at a new generation of political scientists but is a valuable opportunity for established scholars to see new light through old windows
