

Acid-Base Balance

Normal Ranges

pH of Blood	7.35-7.45
ETCO ₂	35-45mmHg
HCO ₃ (Bicarbonate)	22-26 meq/L

HCO₃: Normally, O₂ combines with glucose to create energy and CO₂ is an acid waste by product of this. Bicarbonate is a buffer produced by the body that is alkaline, and binds with CO₂ to neutralize it to allow the body to get rid of it.

Tintinalli's Emergency Medicine: A Comprehensive Study Guide, 9th edition Judith E. Tintinalli, O. John Ma, Donald Yealy, Garth D. Meckler, J. Stephan Stapczynski, David M. Cline, Stephen H. Thomas, 2019-10-22 Publisher s Note Products purchased from Third Party sellers are not guaranteed by the publisher for quality authenticity or access to any online entitlements included with the product The long awaited new edition of the world s most widely used and highly regarded textbook and reference of emergency medicine A Doody s Core Title for 2019 Tintinalli s Emergency Medicine is THE essential resource for everyone working in and teaching emergency medicine The Ninth Edition provides the depth and

breadth of coverage that reflects the complexity and expertise needed to practice emergency medicine in today's fast paced environments. This comprehensive text is an important clinical resource for physicians, residents, and students, advanced practice providers, emergency nurses, EMTs, and paramedics. It is a necessary resource for in-training and board examinations and recertification. Tintinalli's Emergency Medicine covers everything from prehospital care, disaster preparedness, and basic and advanced resuscitative techniques to all the significant medical, traumatic, and environmental conditions requiring emergency treatment in adults, children, and neonates. Highlights of the Ninth Edition: Full color design with more tables than ever to succinctly present key information; Extensive updates to all sections incorporating the latest clinical and evidence-based information; Online access to over 100 videos covering a wide range of diagnostic and therapeutic procedures and POCUS for obstetric, gynecologic, pediatric, musculoskeletal, and vascular conditions; World class pediatric section on the care of neonates, infants, and children; Expanded chapters on the management of gynecologic and obstetric conditions and emergencies; Updated information on toxicologic and environmental emergencies; Contemporary, concise discussion of ED identification and treatment of opioid use disorders; Updated information on procedural sedation; Expert advice on the management and care of transgender patients; Latest information available on neurologic and cardiac emergencies. From the reviews of the seventh edition: Collectively they have once again produced an excellent text that manages to cover the broad scope of emergency medicine while remaining an easily readable and practical resource. Last for the inevitable comparison of this current edition of Tintinalli's Emergency Medicine with other available emergency medicine textbooks available in my opinion, Tintinalli's still comes out on top. It is more concise and easier to read than some, yet it covers the breadth of emergency medicine practice more comprehensively than others. Just as previous editions did, the seventh presents all of the most pertinent and up-to-date information in a well-organized format that is comprehensive yet easy to read. That and many of the attractive new features in this current edition will ensure its place on my bookshelf for years to come. JAMA
