

Laws of Motion

by Carolyn Colley

Sir Isaac Newton was his name,
Observing objects was his game.

He made three rules about what he saw,
When we see motion, it's described by a law.

The first law of motion is just a piece of cake,
To make an object move, all it needs is a shake.

The second law of motion is about a force,
Give it a shove and the object takes that course.

The third law of motion is pure satisfaction
for each force made there's an equal and opposite reaction.

Pushing or pulling, exerting a force
Moving and shaking, it's physics, of course!
