Beginning Algebra John Tobey, Jeffrey Slater, 2004 John Tobey and Jeff Slater are experienced developmental math authors and active classroom teachers They have carefully crafted their texts to support students in this course by staying with them every step of the way Tobey and Slater With you every step of the way This 6th edition of Beginning Algebra is appropriate for a 1 semester course in appropriate for a 1 semester course in Introductory Beginning or Elementary Algebra where a solid foundation in algebraic skills and reasoning is being built for those students who have little or no previous experience with the topic The ultimate goal of this text is to effectively prepare students to transition to Intermediate Algebra One of the hallmark characteristics of Beginning Algebra 6 that makes the text easy to learn from is the building block organization Each section is written to stand on its own and each homework set is completely self testing Beginning Algebra 6 is a worktext meaning the design is open and friendly with wide margins so you can encourage your students to take notes and work exercises right on the text page Also with worktexts images visuals are used more frequently to convey the math concept so there are fewer words and less text for the student to read A Brief Review of Arithmetic Skills Real Numbers and Variables Equations and Inequalities Solving Applied Problems Exponents and Polynomials Organizer Factoring Rational Expressions and Equations Graphing and Functions Systems of Equations Radicals Quadratic Equations For all readers interested in algebra

Elementary Algebra with Early Systems of Equations Tom Carson, Ellyn Gillespie, 2005-02 Tom Carson engages students in the learning process by meeting them where they are and leading them to where they need to be through the determination of their individual learning style the development of study skills and the integration of learning strategies that help each student succeed Elementary Algebra with Early Systems of Equations is a book for the student The authors goal is to help build students confidence their understanding and appreciation of math and their basic skills by presenting an extremely user friendly text that models a framework in which students can succeed

Unfortunately students who place into developmental math courses often struggle with math anxiety due to bad experiences in past math courses. Developmental math students often have never developed nor applied a study system in mathematics. To address these needs the authors have framed three goals for Elementary Algebra 1: reduce math anxiety, 2 teach for understanding and 3 foster critical thinking and enthusiasm. The authors' writing style is extremely student friendly. They talk to students in their own language and walk them through the concepts explaining not only how to do the math but also why it works and where it comes from rather than using the monkey see monkey do approach that some books take. Elementary Algebra with Early Systems of Equations as the title implies places the topic of Systems of Equations early in the text in Chapter 5. This organization is ideal for those instructors who prefer to teach systems of equations immediately following the chapter on graphing and the chapters prior to polynomials and factoring. For those who prefer to teach the topic later Elementary Algebra by the same author team places Systems of Equations in Chapter 8. Foundations of Algebra Solving Linear Equations and Inequalities Problem Solving Graphing Linear Equations and Inequalities Systems of Equations Polynomials Factoring Rational Expressions and Equations Roots and Radicals Quadratic Equations. For all readers interested in elementary algebra

Mathematical Reasoning for Elementary Teachers Calvin T. Long, Duane W.

DeTemple, Richard S. Millman, 2009 The Fifth Edition of Mathematical Reasoning for Elementary Teachers with new co author Richard Millman focuses on mathematical knowledge needed for teaching demonstrating why future teachers are learning math content as well as when they will use it in the classroom. One of the most important aspects of teaching is being able to explain why students' methods and ideas are either right or wrong. Imparting this skill to future teachers the emphasis of this fantastic text. *Algebra and Trigonometry* Marvin A. Bittinger, Judith A. Beecher, David J. Ellenbogen, Judith A. Penna, 2006. With a visual graphical approach that emphasizes connections among concepts this text helps students make the most of their study time. The authors show how different mathematical ideas are tied together through their zeros, solutions, and x intercepts, theme side by side algebraic and graphical solutions, calculator screens, and examples and exercises. By continually reinforcing the connections among various mathematical concepts as well as different solution methods the authors lead students to the ultimate goal of mastery and success in class.
