

Mathematics, Pure 7362

ALTERNATIVE ORDINARY LEVEL

This subject may be taken at both the May/June and January examinations.

Introduction

This syllabus has been constructed so that it assumes knowledge of the topics contained in the syllabus for the subject Mathematics (Syllabus B) at Ordinary level and broadly extends this work. It has been constructed to emphasise the importance of a common core of Pure Mathematics at this level and no distinction has been made between so-called "modern" and "traditional" mathematics.

Aims

The aims of the syllabus are:

- (i) to provide a broad conspectus of mathematics for those who may not study mathematics beyond this level or for those whose course of study requires a knowledge of mathematics beyond Ordinary level;
- (ii) to provide a course of study for those whose mathematical competence may have developed early, and who have a maturity equivalent to that of one year beyond Ordinary level;
- (iii) to enable students to acquire knowledge and skills with confidence, satisfaction and enjoyment;
- (iv) to develop the understanding of mathematical reasoning and processes, and the ability to relate different areas of mathematics;
- (v) to develop resourcefulness in solving problems.

Objectives

The objectives of the examination are to test the ability to:

- (i) demonstrate a confident knowledge of the techniques of pure mathematics specified in the syllabus;
- (ii) apply a knowledge of mathematics to the solutions of problems for which an immediate method of solution is not available and which may involve knowledge of more than one topic of the syllabus;
- (iii) write clear and accurate mathematical solutions.

The Examination

There will be two papers each of 2 hours, carrying equal weighting. Each paper will consist of approximately eleven compulsory questions to be answered in an answer book. Each paper may contain questions from any part of the syllabus and the solution of any question may require knowledge of more than one section of the syllabus.

Questions will be set in SI units.

Candidates are expected to have available a calculator with at least the following keys:

$$+, -, \times, \div, \pi, x^2, x, \sqrt{x}, \frac{1}{x}, x^y; \ln x, e^x$$

sine, cosine and tangent and their inverses in degrees and decimals of a degree, and in radians; memory.
