One of the AutoCAD's greatest assets is its adaptability. You can control just about every aspect of AutoCAD's operations, from appearance of its drawing editor to its variety of menus. Key element of this adaptability is AutoCAD's built-in programming language—Autolisp. With Autolisp you can virtually write your own commands and redefine others.

❑ What Is AutoLISP?

Autolisp is part of LISP programming. LISP programming is used in artificial intelligence programming. Meaning of LISP is **List Processing**. Autolisp program can be written on any editor like notepad, wordpad, Norton, visual lisp editor, etc.

- Load the file from autocad menu (**tools>visual lisp>load application**)
- When message of lisp file successfully loaded is displayed, type command given in program at autocad command prompt, the program is executed.

Applications of Autolisp

- AutoLISP is based on the LISP programming language, which is simple to learn and very powerful. Because AutoCAD has a built-in LISP interpreter, you can enter AutoLISP code at the Command prompt or load AutoLISP code from external files.
- AutoLISP is an application interface for automating of design tasks. When an AutoLISP application is loaded, it functions in its own *namespace* for each drawing that is open. A namespace is an insulated environment keeping AutoLISP applications that are specific to one drawing from having symbol or variable name and value conflicts with those in another drawing.
