Smith, 2017-02-01 As an elementary teacher you know that students are different and learn differently And yet when students enter your classroom you somehow must teach these unique individuals deep mathematics content using rigorous standards Is differentiation really the answer How can it be done well and in less time Nationally

recognized math differentiation expert Nanci Smith debunks the myths revealing what differentiation is and isn't. In this engaging book, Smith reveals a practical approach to teaching for real learning differences. You'll gain insights into an achievable daily differentiation process for ALL students in the K-5 classroom. Theory lite and practice heavy, this book shows how to maintain order and sanity while helping your students know, understand, and even enjoy doing mathematics. Classroom videos, teacher vignettes, ready-to-go lesson ideas, and rich K-5 mathematics examples help you build a manageable framework of engaging sense-making math. Busy K-5 mathematics teachers, coaches, and teacher teams will learn to provide practical structures for assessing how each of your students learns and processes mathematical concepts. Design, implement, manage, and formatively assess and respond to learning in a differentiated classroom. Plan specific standards-aligned differentiated lessons, activities, and assessments. Adjust current instructional materials and program resources to better meet students' needs. This book includes classroom videos in depth, student work samples, student surveys, templates before and after lesson demonstrations, examples of 5-day sequenced lessons, and a robust companion website with downloadables of all the tools in the book, plus other resources for further planning. Every Math Learner: Grades K-5 will help you know and understand your students as learners in order to provide daily differentiation that accelerates their mathematics comprehension. Every Math Learner is a powerful tool for educators serious about meeting the needs of all learners in their mathematics classrooms.
