**Proceedings of the 5th International Conference on AI Research** Renata Paola Dameri, The International Conference on AI Research (ICAIR) is becoming a key forum for academics and students, whether social scientists, natural scientists, or philosophers, come together to explore the future of society in the context of AI. Many aspects of AI are now the subject of peer-reviewed academic research, including the increasing use of Chatbots and GenAI in academe and in society at large. The conference was initially launched in 2019 as the European Conference on Artificial Intelligence and Robotics. After a successful inaugural event in Oxford, the conference fell victim to Covid, and the following three years were held online. Time was taken in 2023 to refocus this fast-developing area of research, and the name of the conference was changed this year to the International Conference on Artificial Intelligence. The Proceedings of the 2025 edition of the conference include academic research papers, PhD research papers, Masters Research papers, and work-in-progress papers, all of which have been presented and discussed at the ICAIR 2025 conference. The proceedings are of an academic level appropriate to a professional research audience, including graduates, postgraduates, doctoral, and post-doctoral researchers. All papers have been double-blind peer-reviewed by members of the Review Committee.

Expert Systems are so far the most promising achievement of artificial intelligence research. Decision-making, planning, design, control, supervision, and diagnosis are areas where they are showing great potential. However, the establishment of expert system technology and its actual industrial impact are still limited by the lack of a sound general and reliable design and construction methodology.
