

Chapter 1

Introduction to Managerial Economics

CHAPTER SUMMARY

Managerial economics is the science of directing scarce resources to manage cost effectively. It consists of three branches: competitive markets, market power, and imperfect markets. A market consists of buyers and sellers that communicate with each other for voluntary exchange. Whether a market is local or global, the same managerial economics apply.

A seller with market power will have freedom to choose suppliers, set prices, and use advertising to influence demand. A market is imperfect when one party directly conveys a benefit or cost to others, or when one party has better information than others.

An organization must decide its vertical and horizontal boundaries. For effective management, it is important to distinguish marginal from average values and stocks from flows. Managerial economics applies models that are necessarily less than completely realistic. Typically, a model focuses on one issue, holding other things equal.

Managerial Economics and Organizational Architecture James A. Brickley,Clifford W. Smith,Jerold L. Zimmerman,2004

This approach to managerial economics takes models from recent economic research and applies them to the internal structure of the firm After teaching basic applied economics the authors look inside the firm and apply this analysis to management decision making The general model used for this application is organizational architecture which consists of three aspects of corporate organization the assignment of decision rights within the company methods of rewarding individuals and the structure of systems to evaluate the performance of both individuals and business units These three elements must balance in an organization

Managerial Economics & Organizational Architecture James A. Brickley,Clifford Smith,Jerold L. Zimmerman,2007 With two distinct objectives this text s approach to managerial economics takes models from recent economics research and applies the research to the internal structure of a firm After teaching basic applied economics the authors look inside the firm and apply this analysis to management decision making Authors Brickley Smith and Zimmerman contend that organizational architecture consists of three aspects of corporate organization the assignment of decision rights within the company methods of rewarding individuals the structure of systems to evaluate the performance of both individuals and business units These three components can be likened to a stool with three legs If one of

the legs is shorter the stool is out of balance These three elements must be in balance in the organization as well
