

Chapter 01: Prescriptive Authority and Role Implementation: Tradition vs. Change Test Bank 2023 Exam Questions.

MULTIPLE CHOICE

1. Which of the following has influenced an emphasis on primary care education in medical schools?

a.	Changes in Medicare reimbursement methods recommended in 1992
b.	Competition from nonphysicians desiring to meet primary care shortages
c.	The need for monopolistic control in the marketplace of primary outpatient care
d.	The recognition that nonphysicians have variable success providing primary care

ANS: A

The Physician Payment Review Commission in 1992 directly increased financial reimbursement to clinicians who provide primary care. Coupled with a shortage of primary care providers, this incentive led medical schools to place greater emphasis on preparing primary care physicians. Competition from nonphysicians increased coincidentally as professionals from other disciplines stepped up to meet the needs.

Nonphysicians have had increasing success at providing primary care and have been shown to be safe and effective.

Chapter Prescriptive Authority And Role Implementation:

Pharmacology for the Primary Care Provider - E-Book Marilyn Winterton Edmunds, Maren Stewart

Mayhew, 2009-02-26 Written by and for nurse practitioners this practical textbook focuses on what primary care providers need to learn and practice drug therapy With an overall emphasis on patient teaching and health promotion you will learn how to provide effective patient teaching about medications and how to gain patient compliance Drug coverage focuses on key drugs rather than prototype drugs so you can find important information about the most commonly used drugs rather than the first drug in each class You will also find discussions on the legal and professional issues unique to nurse practitioners and other primary care providers The 3rd edition also features an expanded emphasis on established clinical practice guidelines and evidence based practice plus two new chapters that cover drugs for ADHD and drugs for dementia

UNIQUE Written specifically for nurse practitioners with an overall emphasis on patient teaching and health promotion

UNIQUE Covers specific topics such as prescriptive authority role implementation and writing prescriptions Presents comprehensive coverage of the drugs most commonly prescribed in and the issues most relevant to primary care practice

UNIQUE Identifies the Top 200 drugs in chapter openers with a special icon and covers them in depth to familiarize you with the most important need to know drug information Uses a consistent heading scheme for each prototype drug discussion to make it easier to learn and understand key concepts Includes an introductory chapter on Design and Implementation of Patient Education that highlights content on patient teaching and compliance Includes specific Patient Education sections in each drug chapter Provides extensive coverage of drug therapy for special populations to alert you to special considerations based on age pregnancy race and other factors A separate chapter on Complementary and Alternative Therapies discusses the available complementary and alternative modalities including detailed information on actions uses and interactions of commonly used herbs Drug Overview tables at the beginning of each chapter outline the classifications of drugs discussed and provide a handy reference of drug classes and subclasses generic names and trade names Clinical Alerts highlight essential information that primary care providers must remember in order to avoid serious problems including cautions for prescribing information about drug interactions or warnings about particularly ominous adverse effects An entire unit covers drugs for health promotion to introduce you to drugs commonly seen in outpatient primary care settings and to prepare you for practice in a society increasingly focused on health promotion and disease prevention Includes separate chapters on Immunizations and Biologicals Weight Management Smoking Cessation Vitamins and Minerals Over the Counter Medications and Complementary and Alternative Therapies

Pharmacology for the Primary Care Provider Marilyn W. Edmunds, Maren Stewart Mayhew, 2004 The only pharmacology resource specifically written by and for nurse practitioners this new edition provides a greater emphasis on prototype drugs while retaining its comprehensive approach to the pharmacology content needed by the primary care provider New features include prototype drug lists in the coverage of drug

classes that receive expanded coverage detailed patient teaching guidelines expanded content in both the geriatric and pediatric chapters a special icon identifying the Top 200 Drugs and highlighted Clinical Alerts Comprehensive coverage is provided of all drugs commonly prescribed and used in the primary care setting Prototype drugs are presented first in each drug class with expanded coverage of these agents Clear explanations describe how each drug in a class differs from its prototype Detailed information shows how to provide effective patient teaching as well as how to gain patient compliance Chapters focus on the practitioner s role in patient teaching drug action and drug therapy Online Resources are provided at the end of each chapter The Top 200 Drugs are described according to the number of U S prescriptions dispensed Five new units improve the organization of material Renal Genitourinary Agents Unit 8 Psychotropic Agents Unit 11 Endocrine Agents Unit 12 Female Reproductive Agents Unit 13 and Health Promotion Unit 15 New chapters examine over the counter medications compliance and the therapeutic experiment overview of the nervous system substance abuse treatment of common infections weight management and complementary and alternative treatments Reorganized and redesigned format and headings are more consistent and easy to follow Content has been expanded in the geriatric and pediatric special populations chapters Ch 6 and 7 More concise coverage of disease processes features clearer ties to the Mechanism of Action sections 25 new figures have been added to the pathophysiology and Mechanisms of Action sections A Table of Common Interactions is included on the inside of the back cover
