

UNIT 1 – STUDYING THE EARTH

CHAPTER 1: INTRODUCTION TO EARTH SCIENCE

Section 1: What is Earth Science?

1. **Ancient Observations:** Early humans used myths to explain natural events like earthquakes and volcanoes, while modern science searches for natural causes.
2. **Modern Science:** Earth science now seeks natural causes for these events through observations and experimentation.
3. **Earth science** studies the Earth and the universe around it, including natural phenomena like volcanoes and earthquakes. Ancient cultures created myths to explain these events, but modern science seeks natural causes.
4. **Branches of Earth Science:**
 - **Geology:** Study of Earth's structure, history, and processes.
 - **Oceanography:** Study of oceans and their movements.
 - **Meteorology:** Study of weather and climate.
 - **Astronomy:** Study of the universe beyond Earth.
 - **Environmental Science:** Study of how humans impact the environment (pollution, resources).

Section 2: Science as a Process

1. **Scientific Methods:**
 - **Observation:** Using senses (sight, touch, etc.) to gather information about the world.
 - **Form a Hypothesis:** A hypothesis is a tentative explanation based on observations. Example: "Plants with more sunlight grow faster."
 - **Test the Hypothesis:** Controlled experiments are conducted with independent and dependent variables.
2. **Scientific Measurements and Analysis:**
 - **Measurement:** Comparing an object or event to a standard unit (SI units for length, mass, temperature, and volume).
 - **Analysis:** Interpretation of the data gathered through measurements to test the hypothesis.
3. **Publication of Results and Conclusions:**
 - **Publication:** Scientists share their results through journals or professional meetings.
 - **Conclusion:** After testing, the hypothesis is either supported or rejected. Results may lead to new research questions or further testing.
4. **Peer Review:**
 - **Peer Review Process:** Other scientists review experiments and research before it is published. This ensures validity and reduces bias by having multiple experts examine the study.
5. **Formulating a Theory:**
 - **Theory:** When a hypothesis has been tested multiple times and supported by consistent evidence, it may become a theory.
 - **Scientific Law:** A well-supported and universally accepted statement of fact about natural phenomena.

Earth Science Gustav L. Fletcher,2018-02-08 Excerpt from Earth Science A Physiography The introductory chapter gives a general idea of what has hap pened on the earth and what is going on now so that the pupil is made aware of the aim of the entire subject This is followed by a study of the materials of which the earth is made rocks and of the forces acting upon those materials Having learned that much the pupil is in a position to understand how these forces have modified the earth s surface and made it what it is today The land is studied first because pupils are more likely to know something about land to begin with It is for that reason they find land studies easier than the rest of the subject This is followed by a short history of the earth designed to teach the student how the earth came to its present condition The chapter is optional but the author feels that many of the better students will be eager to read it The study of the land will probably occupy the first half of a year The pupils who have successfully completed the first half will then study the earth s relations in space seasons latitude longitude time the atmosphere and associated phenomena like weather and climate And the year s work is brought to an end by the study of the sea with special emphasis on harbors The text is printed in type of two sizes larger type for the essential material and smaller for the Optional Each chapter has a completion summary which the pupil is required to Copy and complete This avoids the objection that many teachers have to the ordinary summary that some pupils read only the summary The completion summary acts as a self test for if the pupil is able to fill in the blanks he knows that he has learned his lesson and this knowledge carries with it a sense of mastery and hence a feeling of satisfaction At the end of each chapter are questions on every important point in the text and the teacher may well use these questions as a chief part of his assignment There is also a set of optional questions which will challenge the best students to extend themselves About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
