Colouring In Dog Mask:

Canaan Dog Joy Levine, 2012-10-16 Dating back to Biblical times the Canaan Dog enjoys the distinction of being the world's oldest new dog breed. The national dog of Israel, the Canaan Dog's ancestors once served as herding dogs for the Israelites' flocks. Author Joy Levine has written excellent introductory chapters on the breed's history in Israel, England, and the United States, as well as the breed's characteristics as a companion and working dog. The chapter on the breed standard, illustrated by Patricia Peters, offers a clear picture of the desired physical conformation of this unique Herding breed, useful for both newcomers and experienced breeders. New owners will welcome the well-prepared chapter on finding a reputable breeder and selecting a healthy, sound puppy. Chapters on puppy proofing the home and yard, purchasing the right supplies for the puppy, as well as house training, feeding, and grooming, are illustrated with photographs of handsome adults and puppies. In all, there are over 135 full-color photographs in this useful and reliable volume. The author's advice on obedience training will help the reader better mold and train into the most well-mannered dog in the neighborhood. The extensive and lavishly illustrated chapter on healthcare provides up-to-date, detailed information on selecting a qualified veterinarian, vaccinations, preventing and dealing with parasites, infectious diseases, and more. Sidebars throughout the text offer helpful hints covering topics as diverse as historical dogs, breeders or kennels, toxic plants, first aid, crate training, carsickness, fussy eaters, and parasite control. Fully indexed.

Medical, Genetic & Behavioral Risk Factors of the Canaan Dog Ross D. Clark DVM, 2015-06-20 This book, *Canaan Dog*, provides you with a thorough description and positive attributes of this breed, including origin, purpose, history, normal heights and weights, acceptable colors, and behavioral traits. Our books differ from most books on dog breeds because this book also provides you with a comprehensive and authoritative source of all the known predisposed hereditary health syndromes for the breed. You will find extensive references for each problem described. We also provide the breed club address for this breed and a list of laboratories and organizations that can provide professional help and information. As a small animal veterinarian, I have always been intrigued by the way dogs have been bred to fill a purpose in life and further impressed that they also tend to love performing that service. Greyhounds and other sight hounds are built for speed with aerodynamic bodies consisting of small head, deep chest, narrow waist, and large leg muscles. On the other hand, Dachshunds take their name from German words meaning badger dog, and they use their long nose, long body, and short legs to both track and dig into badger dens. After developing a practice that catered to clients with show dogs, my interest in each breed continued to grow as I studied and observed more and more about the unique predisposition and incidence of health problems in each breed. Breeders of purebred dogs for show were a challenge and inspirational for me to research and help them with their unique health problems. Historically, references to hereditary problems are scattered throughout various Veterinary medical texts and journals such as ophthalmology, neurology, gastroenterology, cardiovascular, and dermatology. This book, as well as the other books and articles I have written, is

researched and compiled with the intention to provide both veterinarians and dog owners with comprehensive and authoritative predisposition information under the breed name At the date of this publication The American Kennel Club Canine Health Foundation and the The Kennel Club of England reports over 400 known hereditary health syndromes throughout the dog kingdom At the writing of my first book in 1983 less than 50 hereditary issues are able to be predicted and or diagnosed Sequencing of the canine genome DNA tests metabolic testing including blood tests and urine testing plus phenotypic examinations such as radiographs ultrasound and CERF or OFA eye registry exams by a Board Certified Veterinary Ophthalmologist have advanced the science of breed related health and behavioral problems This book will provide veterinarians researchers pet owners and breeders with a comprehensive guide to all the known problems veterinarians and dog owners should consider during pet selection and throughout each life stage of our canine friends
