Drawing as Expression Sandy Brooke,2002 Human communication is grounded in fundamentally cooperative even shared intentions In this original and provocative account of the evolutionary origins of humancommunication Michael Tomasello connects the fundamentally cooperative structure of humancommunication initially discovered by Paul Grice to the especially cooperative structure of human as opposed to other primate social interaction Tomasello argues that human cooperativecommunication rests on a psychological infrastructure of shared intentionality joint attention common ground evolved originally for collaboration and culture more generally The basic motivesof the infrastructure are helping and sharing humans communicate to request help inform others ofthings helpfully and share attitudes as a way of bonding within the cultural group Thesecooperative motives each created different functional pressures for conventionalizing grammaticalconstructions Requesting help in the immediate you and me and here and now for example requiredvery little grammar but informing and sharing required increasingly complex grammatical devices Drawing on empirical research into gestural and vocal communication by great apes and human infants much of it conducted by his own research team Tomasello argues further that humans cooperativecommunication emerged first in the natural gestures of pointing and pantomiming Conventionalcommunication first gestural and then vocal evolved only after humans already possessed thesenatural gestures and their shared intentionality infrastructure along with skills of culturalllearning for creating and

passing along jointly understood communicative conventions Challenging the Chomskian view that linguistic knowledge is innate Tomasello proposes instead that the most fundamental aspects of uniquely human communication are biological adaptations for cooperative social interaction in general and that the purely linguistic dimensions of human communication are cultural conventions and constructions created by and passed along within particular cultural groups
