computing environment      Generative AI for Effective Software Development Anh Nguyen-Duc, Pekka Abrahamsson, Foutse Khomh, 2024-05-31 This book provides a comprehensive empirically grounded exploration of how Generative AI is reshaping the landscape of software development. It emphasizes the empirical evaluation of Generative AI tools in real world scenarios offering insights into their practical efficacy, limitations and impact. By presenting case studies, surveys and interviews from various software development contexts, the book offers a global perspective on the integration of Generative AI, highlighting how these advanced tools are adapted to and influence diverse cultural, organizational and technological environments. This book is structured to provide a comprehensive understanding of Generative AI and its transformative impact on the field of software engineering. The book is divided into five parts, each focusing on different aspects of Generative AI in software development. As an introduction, Part 1 presents the fundamentals of Generative AI adoption. Part 2 is a collection of empirical studies and delves into the practical aspects of integrating Generative AI tools in software engineering, with a focus on patterns, methodologies and comparative analyses. Next, Part 3 presents case studies that showcase the application and impact of Generative AI in various software development contexts. Part 4 then examines how Generative AI is reshaping software engineering processes, from collaboration and workflow to management and agile development. Finally, Part 5 looks towards the future, exploring emerging trends, future directions and the role of education in the context of Generative AI. The book offers diverse perspectives as it compiles research and experiences from various countries and software development environments. It also offers non-technical discussions about Generative AI in management, teamwork, business and education. This way, it is intended for both researchers in software engineering and for professionals in industry who want to learn about the impact of Generative AI on software development.

*The Nineteenth International Conference on Management Science and Engineering Management* Jiuping Xu, Sophie Dabo-Niang, Noor Azina Binti Ismail, Ning Gao, 2025-10-29 This is the proceedings of the Nineteenth International Conference on Management Science and Engineering Management (ICMSEM) 2025. The Program Committee Chairs, which are famous scientists in the area of management science and engineering management, and Program Committee Members, which are active scholars from all over the world, will review the submissions and select high quality papers to be published in the proceedings. ICMSEM provides a platform for researchers and practitioners of Management Science, Engineering Management and Engineering Science to share ideas, exchange experiences. ICMSEM encourages papers that have the following five elements: 1. strong background of practical management problem found in engineering practice; 2. clear problem description and abstract it as a class of problem in Management Science and Engineering Management topics such as decision analysis, manufacturing management, engineering project management, knowledge management, logistics, supply chain management, service innovation and management, as well as a variety of multi-class interdisciplinary research; 3. effective mathematical engineering modelling, for example, creating engineering mathematical model and conducting abstract engineering mathematical analysis by using statistical mechanics.

operations research systems science differential equations variational inequalities control theory econometrics 4 algorithm framework design namely designing of algorithm model for solving engineering problems successfully 5 successful application or case study in Engineering Management to show its scientificity and effectiveness The proceedings of the Nineteenth ICMSEM cover a wide range of areas including hot management issues in Engineering Science It provides newest and frontier ideas and research achievements in the area of Management Science and Engineering Management to researchers and practitioners The work contains both theoretical and practical studies of Management Science in the Computing Methodology showing the advanced management concepts computing technologies for decision making problems with large uncertain and unstructured data Research in this proceeding will show the new changes and challenges in the decision making procedure as we have entered the big data era Theoretical studies of this proceedings will present the new technologies of analysis capture search sharing storage transfer visualization and privacy violations as well as advances in integration of optimization statistics and data mining This proceeding also contains practical studies in the real decision making scenarios when facing large uncertain or unstructured data The readers who are interested in related fields of can benefit from the proceedings for the new ideas and research direction **From Street-smart to Web-wise®** Al
