Drawing Traditional Buildings:

Drawing Traditional Buildings Richard S. Taylor, 1987-01-01 Drawing for Understanding Allan T. Adams, 2016 This guidance describes a method of recording historic buildings for the purpose of historical understanding using analytical site drawing and measuring by hand. The techniques described here have a long tradition of being used to aid understanding by observation and close contact with building fabric. They can be used by all involved in making records of buildings of all types and ages but are particularly useful for vernacular buildings and architectural details which are crucial to the history of a building or site. Record drawings are best used alongside other recording techniques such as written reports and photography or to supplement digital survey data. They can also be used as a basis for illustrations that disseminate understanding to wider audiences.

Architectural Drawing Rendow Yee, 2012-07-31 The classic architectural drawing compendium now in a richly updated edition. Today's most comprehensive compendium of architectural drawing types and methods both hand drawn and computer generated. Architectural Drawing A Visual Compendium of Types and Methods remains a one of a kind visual reference and an outstanding source of guidance and inspiration for students and professionals at every level. This Fourth Edition has been thoroughly updated to reflect the growing influence of digital drawing. Features include More than 1 500 drawings and photographs that demonstrate the various principles, methods and types of architectural drawing. Examples by an impressive array of notable architects and firms including Tadao Ando, Asymptote, Santiago Calatrava, Coop Himmelb(l)au, Norman Foster, Frank Gehry, Zaha Hadid, Steven Holl, Arata Isozaki, Toyo Ito, Gudmundur Jonsson, Kohn Pedersen Fox, Ricardo Legorreta, Morphosis, Patkau Architects, Pei Partnership Architects LLP, Renzo Piano, Antoine Predock, SANAA, David Serero, Studio Daniel Libeskind, Studio Gang, Bing Thom, Tod Williams and Billie Tsien, and UN Studio. A brand new chapter: Introduction to the Digital Manual Interface which covers how digital and traditional drawing techniques can be used in conjunction with each other. A new chapter on guidelines for portfolio building. Content organized in a streamlined, easy to use fashion. Supplementary online instructor resources including PowerPoint slides tied to the book. This volume reveals how architects approach drawing as a process wherein ideas are given form. As a tool for teaching, these examples become important in students' understanding of the formal and technical aspects of design thought. In an age of digital technologies, this work emphasizes the intimate relationship that exists between the drawing and its maker, the process between paper, hand and mind. LaRaine Papa, Montgomery Professor of Architecture Graphics Coordinator, Savannah College of Art and Design. This book contains a wealth of information on architectural graphic communication. My students have found this to be an invaluable resource for graphic presentation techniques ranging from traditional hand drawing to advanced computer graphics. It features an amazingly wide range of examples including both student work and professional work by renowned architects. With the addition of a new chapter on portfolio design, this new edition illustrates the full gamut of graphic communication skills from the conceptual sketch through the documentation of

the final portfolio Mark A Pearson AIA LEED AP Associate Professor of Architecture College of DuPage This book should be in the library of all architecture and design students as well as practicing professionals The richness and variety of hand drawn and digital illustrations by students and architects offers deep insight into the many drawing types and methods used today The section on portfolios is a helpful and timely addition Professor Michael Hagge Chair Department of Architecture The University of Memphis

Craft Theory and Contemporary Architecture Grant Alford, 2025-05-28 This book offers a comprehensive exploration of craft theory in relation to contemporary architecture Craft is an old and familiar idea but the line between craft and art or craft and mere manufacturing for example is notoriously hard to describe In architecture a similarly blurred line between the design process on the one hand and the physical making of buildings on the other lies at the center of various debates about what it means to do architecture The growth and development of craft theory in recent years suggest new insights into these architectural debates but situating the meaning of craft within architecture within today's technological landscape is a complex problem Alford responds to this challenge by collecting various narratives from craft theory and other fields and discerning among them new lenses through which to view contemporary architectural practice Episodes from this expanded view of craft in architecture go beyond predictable accounts of Ruskin and Morris to envision new models of practice new ways of engaging other building professionals and new ways for architects to understand their own labor and the nature of how and what kinds of things they themselves craft Architecture is changing and within the ongoing story of craft explored in this book are new and surprising ways to understand design and construct the built environment Written for students and scholars this book challenges and extends the legacy of craft thinking in architecture
