CHAPTER 5 Section 1

Reading Comprehension 3

- Answers for rankings will vary.

Historical basis: The two-party system is rooted in the beginnings of the U.S., when the ratification of the Constitution gave rise to the first two parties.

Tradition: Most Americans accept the idea of a two-party system simply because there has always been one.

Electoral system: Since only one winner per office comes out of each election, voters have only two viable choices—the candidate of the party holding office or the candidate with the best chance of replacing the current officeholder. Voters tend to think of a vote for a minor party candidate as a wasted vote. Republicans and Democrats work together in a bipartisan way to write election laws to make it hard for a minor party or independent candidate to win elective office.

Ideological consensus: Compared with other countries, the U.S. has been free of longstanding disputes based on economic class, social status, religious beliefs, or national origin. As a result, there is a lot of common ground between the two major parties, although they disagree on specific policies.
- Policies supported:**

Democrats: social welfare programs; government regulation of business; efforts to improve status of minorities.

Republicans: depend on play of market forces in the economy; less government involvement in social welfare programs.

Reading Comprehension 2

- a. Parties choose candidates.

Futures in Reverse Martin Cross, In the high stakes arena of global commodities the price of oil or wheat today is rarely the same as its price three months from now To navigate this uncertainty Wall Street relies on futures contracts creating a complex mathematical landscape defined by two opposing forces contango and backwardation When a market is in contango future prices are higher than the current spot price usually reflecting the heavy costs of storing massive physical assets like crude oil However when supply chains snap and panic sets in the market violently flips into backwardation where immediate delivery becomes so desperate that buyers pay a

massive premium over future prices This inversion forces institutional investors into a brutal arbitrage game utilizing floating oil tankers and hidden warehouses to exploit the mechanical glitches in the pricing of time itself Futures in Reverse demystifies the invisible calculus of commodity trading It reveals how hedge funds and logistics giants manipulate physical storage to extract guaranteed profits from the fluctuating curve of global anxiety Master the obscure mathematics that dictate global supply chains Understand the mechanics of contango and learn how the financial elite weaponize physical storage to turn the passage of time into liquid capital bisac BUSINESS they trade the mathematical cost of time itself turning physical storage into guaranteed financial arbitrage Martin Cross Futures in Reverse Contango Backwardation and the Time Traveling Mathematics of Commodities **Modern Principles of Economics** Tyler Cowen,Alex Tabarrok,2014-12-12 Engaging and provocative writing as well as a knack for revealing the invisible hand of economics at work have made Cowen and Tabarrok s Modern Principles of Economics a singularly distinctive and effective textbook for the principles course The thoroughly updated new edition of Modern Principles again draws on a wealth of captivating applications to show readers how economics shed light on business politics world affairs and everyday life just as the authors do in their wildly successful blog marginalrevolution com **Agricultural Supply Response to Trade and Exchange Rate Reforms in Nigeria** Abidemi Abiola,2018-11-09 Doctoral Thesis Dissertation from the year 2017 in the subject Agrarian Studies University of Ibadan Department of Economics course Economics language English abstract The study was anchored on theories of production and supply response A Nerlovian supply response model 1956 as modified by Karbasi and Tavana 2008 which captures the impact of trade and exchange rate reforms on agricultural commodities prices and outputs and with acreage cultivated labour and cost of agricultural machinery as control variables was explored Major cash crops cocoa palm produce palm kernel groundnuts rubber and cotton and food cassava maize yam and rice accounting for 28 0% of the 40 0% of staple food output were purposively selected Data were collected from the World Trade Organisation Trade Statistics World Bank UN COMTRADE statistics and World Development Indicators Food and Agricultural Organisation Year Book Statistics and Agricultural Market Access Database Central bank of Nigeria s Statistical Bulletin and National Bureau of Statistics Annual Abstracts of Statistics A Structural Vector Autoregression model was estimated via the generalized Impulse response functions and variance decomposition estimation techniques All estimates were validated at p 0 05 Trade policy shifted from a restrictive regime in 1970 to a liberalized regime starting from 1995 Exchange rate policy similarly moved from a fixed regime in 1970 to a managed float regime from 1986 to 2013 These reforms had diverse significant effects on both the prices and outputs of all sampled agricultural commodities Trade effect was positive for palm kernel cotton rubber and cassava while negative for the others The effects were permanent across the ten commodities while the elasticities for all the commodities range between 0 002 and 0 05 Exchange rate effect was positive for palm kernel cotton maize and rice while negative for the others The effects were also permanent except for rubber which was transitory while elasticities for the

commodities range between 0.1 and 2.3. On aggregate, the cost of machinery was found to be negatively related to the commodities outputs. A percentage increase in the cost of machinery brings about a 15.0 percent decline in output. Land and labour were positively and negatively related to output respectively. An additional acre of land cultivation increased aggregate supply by 31.1% while an increase in the use of labour decreased output by 19.0%. Trade and exchange rate reforms were critical in explaining the supply responses of sampled commodities hence the need for favourable and stable reforms.

Exploring Macroeconomics Robert L. Sexton, 2005. The 4th Edition of Robert Sexton's *EXPLORING MACROECONOMICS* is now available in a modular format. The 4th Edition offers the macroeconomics content in 5 modules. In other words, it costs less than a traditional macroeconomics text. Buy a product that provides more value for your dollar. You no longer have to buy the same material twice. Your instructor will not get through during the term. You are no longer paying for unused material and no longer carrying a heavy text.

[Managing the Global Supply Chain](#) Tage Skjott-Larsen, 2007. The world today faces global competition. The supply chain is a vital part of the globalization process. Presenting a global view of the scope and complexity of supply chain management, this book reflects the rapid change that has taken place within the supply chain and its environment. This third edition has been fully updated with recent changes in concepts, technology and practice. Integration and collaboration are keywords in future competition. Firms must be agile and lean at the same time. The book gives an insightful overview of the conceptual foundations of the global supply chain as well as current examples of the best practice of managing supply chains in a global context.
