Chasing The Moon:

Chasing the Moon Robert Stone, Alan Andres, 2019-06-04 JFK issued the historic moon landing challenge. These are the stories of the visionaries who helped America complete his vision with the first lunar landing fifty years ago. A Companion Book to the AMERICAN EXPERIENCE Film on PBS. Going in depth to explore their stories beyond the PBS series. Writer/producer Robert Stone called one of our most important documentary filmmakers by Entertainment Weekly brings these important figures to brilliant life. In 1961 President John F. Kennedy proposed the nation spend twenty billion dollars to land a man on the Moon before the end of the decade. Based on eyewitness accounts and newly discovered archival material, *Chasing the Moon* reveals for the first time the unknown stories of the fascinating individuals whose imaginative work across several decades culminated in America's momentous achievement. More than a story of engineers and astronauts, the moon landing, now celebrating its fiftieth anniversary, grew out of the dreams of science fiction writers, filmmakers, military geniuses, and rule-breaking scientists. They include Science fiction author Arthur C. Clarke whose writing inspired some of the key players in the Moon race. A scientific paper he wrote in his twenties led to the U.S. beating Russia in one area of space communications: satellites. Wernher von Braun, the former Nazi military genius who oversaw Hitler's rocket weapons program. After working on ballistic missiles for the U.S. Army, he was recruited by NASA to manage the creation of the Saturn V moon rocket. Astronaut Frank Borman, commander of the first mission to circumnavigate the Moon, whose powerful testimony before Congress in 1967 decisively saved the U.S. lunar program from being cancelled. Poppy Northcutt, a young mathematician who was the first woman to work in Mission Control. Her media exposure as a unique presence in this all-male world allowed her the freedom to stand up for equal rights for women and minorities. Edward Dwight, an African American astronaut candidate recruited at the urging of the Kennedy White House to further the administration's civil rights agenda, but not everyone welcomed his inclusion. Setting these key players in the political, social, and cultural climate of the time and including captivating photographs throughout, *Chasing the Moon* focuses on the science and the history, but most important, the extraordinary individuals behind what was undoubtedly the greatest human achievement of the twentieth century.

Eclipsed Emotions Zaara Aimen, 2025-02-04 *Eclipsed Emotions* explores the untold depths of the soul. It is for the readers who feel deeply but struggle to express themselves in words. Zaara weaves these silent struggles into heartfelt verse. This collection serves as a comforting companion, reminding you that you are not alone and finally allowing you to embrace the shadows in your heart. *Eclipsed Emotions* invites you to embark on your journey on an emotional rollercoaster, taking you through the highs and lows of the ocean waves while gazing at the moon and the stars, hoping for the sun to rise. With the moon as a confidant, the sun as an artist, and the stars as the guardians of unspoken dreams, this collection takes you through turbulent waves of despair and the calm after the storm. For those who have felt lost but dreamt of being found, these poems will light your path. *Chasing the Moon: the Story of the Space Race - from Arthur C. Clarke To the Apollo Landings* Robert

The Film Renter and Moving Picture News ,1922 **Negative Media** Ella Klik,2026-02-17 In a world inundated by an endless proliferation of texts images and data the tension between the human desire to preserve and the economic incentive to retain collides with the finite nature of storage and its attendant costs The impulse to keep everything inevitably confronts material constraints compelling a reckoning with erasure as a necessity that enables ongoing creation As this book reveals such considerations are far from unique to the digital age Spanning early analog sound recordings to contemporary debates about digital cloud solutions Negative Media proposes that acts of removal cutting deletion and effacement shape the invention and use of popular storage technologies from the 19th century to the present Ella Klik invites readers to reconsider how recording mechanisms operate arguing that negation is not a design flaw but a process intentionally woven into the very fabric of these systems Through engaging stories including the accidental deletion of the Apollo 11 moon landing tapes the book traces a genealogy of undoing that reframes our understanding of media s lifecycle from production to managing scarcity and abundance Rather than privileging long term retention as the primary framework for analysis Klik navigates through media histories and theories to foreground reuse at a moment where prevailing narratives insist perhaps too boldly that nothing can ever truly disappear from the internet *In the Shadow of the Moon* Anthony Aveni,2017-04-25 From an award winning author astronomer and anthropologist an exploration of the scientific and cultural significance of the mesmerizing cosmic display Since the first humans looked up and saw the sun swallowed by darkness our species has been captivated by solar eclipses Astronomer and anthropologist Anthony Aveni explains the history and culture surrounding solar eclipses from prehistoric Stonehenge to Babylonian creation myths to a confirmation of Einstein s theory of general relativity

to a spectacle that left New York City in the moon's shadow to future eclipses that will capture human imaginations. In one accessible and engaging read, Aveni explains the science behind the phenomenon, tracks eclipses across the ancient world, and examines the roles of solar eclipses in modern times to reveal the profound effects these cosmic events have had on human history. Colored by his own experiences, Aveni has witnessed eight total solar eclipses in his lifetime; his account of astronomy's most storied phenomenon will enthrall anyone who has looked up at the sky with wonder. Aveni's authoritative but accessible text is the clearest statement of the way our perception of eclipses has changed over the centuries.

Stuart Clark, *New Scientist*: Authoritative and engaging.
Marcelo Gleiser, *NPR*: 13/7 A recommended way to share the spirit of the occasion.
Laurence A. Marschall, *Natural History* magazine: Everything you need to enjoy a solar eclipse and even predict one just like the Babylonians did. Aveni's entertaining explorations show the very different impacts eclipses have had on past and present cultures.
