gain applicants' trust? Ajla Besirevic,2026-02-19 Master s Thesis from the year 2025 in the subject Leadership and Human
Resources Recruiting grade 1 2 University of Applied Sciences Dortmund language English abstract This master s thesis
explores the role of artificial intelligence AI in modern recruitment processes with a particular focus on applicants trust As
digitalization and AI increasingly transform the world of work organizations are adopting AI supported recruiting tools to
enhance efficiency standardization and data driven decision making At the same time the use of AI in personnel selection
raises important questions regarding transparency fairness and acceptance from the applicants perspective The objective of
this thesis is to examine how applicants perceive AI assisted recruitment processes and which aspects are relevant for the
development of trust in this context To address this research objective a qualitative research design was chosen Semi
structured interviews were conducted with participants who had either experienced AI supported recruitment processes or
reflected on their expectations toward such processes The empirical data were analyzed using qualitative content analysis
following Kuckartz approach This method allows for a systematic examination of subjective perceptions attitudes and
evaluations while combining theory driven and data driven coding The analysis focuses on applicants experiences with
different forms of AI usage in recruitment their expectations toward human and technological decision making and their
assessment of AI supported processes within the broader candidate journey By linking theoretical concepts of trust in
technology with empirical insights from applicants this thesis contributes to the growing body of literature on AI in recruiting
In addition it provides a structured foundation for further academic research and offers valuable insights for organizations
